

YASKAWA

ONE FOR ALL

SINGULAR CONTROL™

Robots, Servos & Drives,
now Controlled by ONE SOFTWARE

Yaskawa introduces Singular Control™: robotics, servo systems and variable speed drives working together under one software package. Singular Control uses the same ladder logic you've used for years, allowing you to develop new automation without the need for a robot programmer.

Pick, pack and palletize with new programming power, superior speed and industry-leading effectiveness, thanks to an innovation that puts Yaskawa performance and reliability into more innovative automation designs than ever before.
