1. Precautions concerning use

Precaution concerning use is required during the replacement of Σ -V series with Σ -7 series. The details are given in the table below.

Verification items	Precautions	
	Usage status in Σ -V	Usage method in Σ -7
Using SGD V SERVOPACK	Using SGD V-□□□A0□□ (AC200V input, analog voltage /pulse string command, rotational/ linear)	Replaceable with SGD7S-□□□A00A (analog voltage/pulse string command type). In Σ -7 series, model is common in both rotational and linear types.
	Using SGD V-□□□A1□□ (AC200V input , MECHATROLINK-II communication command, rotational/ linear)	Replaceable with SGD7S-□□□A10A (MECHATROLINK-II communication command type). In Σ -7 series, model is common in both rotational and linear types.
	Using SGD V-□□□A2□□ (AC200V input , MECHATROLINK-III communication command, rotational/ linear)	Replaceable with SGD7S-□□□A20A (MECHATROLINK-III communication command type). In Σ -7 series, model is common in both rotational and linear types.
	Using SGD V□□□A□1□□□□□□□□□□ 1 or SGD V-OFA01A (full close module)	Can be replaced by a combination of SGD7S and SGD V-OFA01A. Cannot be replaced by SGD7W.
	Using SGD V□□□A□□□□□□□□□□□□ 1 □ or SGD V-OSA01A (safety module)	Can be replaced by a combination of SGD7S and SGD V- OSA01A. Cannot be replaced by SGD7W.
	Using SGD V□□□AE□□□□□□□□□□□□ □ (O=1, 5, 6) or SGD V-OCA0△A (△=3, 4, 5) (INDEXER module, or DeviceNet module)	This is not replaceable. There is a plan to expand the models of command option mounting-type in SGD7S and support combination with SGD V-OCA0△A. The time frame has yet to be determined. In addition, this product cannot be replaced with SGD7W.
	Using SGD V-□□□F□□□ (AC100V input)	There is no model in SGD7□ that supports AC100V input. A compatible model is planned at a future date to be determined.
	Using SGD V-□□□D□□□ (AC400V input)	There is no model in SGD7□ that supports AC400V input. A compatible model is planned at a future date to be determined.
	Using SGD V-□□□A2□□0□□EX001 (Σ -V-EX001, M-III high-speed communication)	Replaceable with SGD7S-□□□A20A (MECHATROLINK-III communication command type)
	Using SGD V-□□□A□□□0□□EX002 (Σ -V-EX002, deviation-less specification)	There is currently no deviation-less function in SGD7 □. Compatibility with this function is planned in Σ -7-EX/FT at a future date.
	Using SGD V-□□□A□□□0□□FT001 (Σ -V-FT001, improved vibration suppression function level)	This is not replaceable. In the case of using only the notch filter function, it is replaceable with SGD7S.
	Using SGD V-□□□A□□□0□□FT003 (Σ -V-FT003, pressure feedback control function)	There is no pressure feedback control function in SGD7□.Compatibility with this function is planned in Σ -7-EX/FT at a future date.
	Using SGD V-□□□A2□□0□□FT006 (Σ -V-FT006, fixed point passage output function)	There is no fixed-point passage output function in SGD7□.Compatibility with this function is planned in Σ -7-EX/FT at a future date.
	Using SGD V-□□□A01□□□FT008 (Σ -V-FT008, absolute value system application compatible)	There is no absolute value system function in SGD7 □.Compatibility with this function is planned in Σ -7-EX/FT at a future date.
	Using safety signal input (CN8) in SGD V	Replaceable with SGD7S. Also, there is no safety signal input in SGD7W. Although there is a plan to make it compatible in hardware option type, the connector will be the downside type.
Using online vibration monitor function	There is no online vibration monitor function in SGD7 □. Please measure the actual vibration by SigmaWin+ trace function.	
Verification items	Precautions	
	Usage status in Σ -V	Usage method in Σ -7
Using in SGM□V-type servo motor	Using SGMJV-type servo motor	The recommended replacement motor is SGM7J. Its motor characteristics are different from the SGMJV. For more details, please check the catalogue and characteristics table. You can choose whether to use the cable for

		SGM7J or use the SGMJV cable without any modification. In the case of using the cable for SGM7J, the direction of lead and height of connector are different from Σ -V series. For more details, please see the catalogue and outline drawing. In the case of using the SGMJV cable without any modification, protective structure will be IP65 and encoder cable will be anti-load side type.
	Using SGM7A-type servo motor	The recommended replacement motor is SGM7J. Its motor characteristics are different from the SGMJV. For more details, please check the catalogue and characteristics table. You can choose whether to use the cable for SGM7A or use the SGMJV cable without any modification. In the case of using the cable for SGM7A, the direction of lead and height of connector are different from Σ -V series. For more details, please see the catalogue and outline drawing. In the case of using the SGMJV cable without any modification, protective structure will be IP65 and encoder cable will be anti-load side type.
	Using SGM7G-type servo motor	The recommended replacement motor is SGM7G. Its motor characteristics are different from the SGM7J. For more details, please check the catalogue and characteristics table. Also, the standard shaft diameter of SGM7G-03/09/13 is different from that of the SGM7J-03/09/13. For details, please see the outline drawing. If a shaft diameter similar to that of SGM7J is desired, please discuss separately.
	Using SGM7A-type servo motor	The recommended replacement motor is SGM7A. Its motor characteristics are different from the SGM7J. For more details, please check the catalogue and characteristics table. Please note that the external appearance of SGM7A-10 is different from the SGM7J-10. Also note that the receptacle position on the motor side is different from the SGM7A-30 (without brake). For more details, please refer to the catalogue and outline drawing.
Using SGM7P-type servo motor	Using SGM7P-type servo motor	The recommended replacement motor is SGM7P. Please note that the motor encoder resolution is different from the SGM7J.
Motor replacement (All models)	Using motor with DC90V holding brake.	There is no motor with DC90V holding brake in SGM7J. Please try substituting with a motor that has a DC24V holding brake.

The improvements in function and performance when Σ -V is replaced with Σ -7 are as given below.

- Improvement in usage environmental conditions- Usage temperature : -5°C to +60°C (rated value of decrease is +55°C or more), elevation: 2000m or below (1000m or more is the rated value)
- Improvement in motor waterproofing protective structure IP67 (When cable for Σ -7 is used)
- Improvement of motor encoder resolution to 24 bit
- Improvement in speed frequency response to 3.1kHz
- Addition of various functions: Enhancement of vibration suppression function, ripple compensation function, friction model compensation function, force stop function, etc.
- Monitor, warning detection addition: Life prediction monitor, power consumption monitor, FAN warning detection, etc.

1-1. Check sheet for replacement of Σ -V with Σ -7

Category	Item	Check points	チェック
Motor	Body	<Verification of body mounting position> <ul style="list-style-type: none"> Please verify the dimensions for mounting of motor and machine while using: Seal case diameter, mounting hole pitch, mounting hole diameter, shaft diameter, shaft shape (straight, key, center tap, taper), etc. 	
		<Verification of special specifications> <ul style="list-style-type: none"> Please verify that the motor being used is not a customer-specific model. If the model is customer specific, please check the specifications in the delivery specification document. 	
	Cable	<Verification of cable lead direction> <ul style="list-style-type: none"> The lead direction changes from the Σ-V cables to the Σ-7 cable. Therefore, please ensure that it does not interfere with the slicing or machine. If Σ-V cable is used without any modification, please note that the lead direction of encoder cables changes in SGM7J, SGM7A 1kW and lower models. 	
SERVOPACK (body)	Body	<Verification of body mounting position> <ul style="list-style-type: none"> Please verify the dimensions (W/H/D) and mounting hole position of the SERVOPACK while using. 	
		<Verification of special specifications> <ul style="list-style-type: none"> Please check the delivery specification and verify that the NP and shape of the SERVOPACK being used is not customer specific, and also that it is not fabricated (special process etc.) 	
		<Verification of safety signal input> <ul style="list-style-type: none"> Please verify that the SERVOPACK being used is utilizing safety signal input. There is no safety input in SGD7W. There is a plan to provide the safety input as an option but the connector will be the downside type. 	
	Option	<Verification of specifications of the optional module> <ul style="list-style-type: none"> Please verify that the SERVOPACK being used is utilizing the optional module. Command option cannot be replaced. Also, the optional module is not available in SGD7W. 	
	Main circuit	<Single-phase power input> <ul style="list-style-type: none"> To use with single-phase power input, please connect the main circuit power cable to L1 and L2. To use with single-phase power input, please change the parameter "function selection switch E". (Pn00E.2=1) 	
		<DC power input> <ul style="list-style-type: none"> It is required to add a circuit to prevent in-rush between the DC power and SERVOPACK by using a protective fuse and other devices. To implement this, please approach our sales department. DC power input can be used by changing the parameter "function selection switch 1". (Pn00E.0=1) Note: Please connect the main circuit DC power after changing the parameter. 	
SERVOPACK (software)	Software	<Verification of presence/absence of dedicated software> <ul style="list-style-type: none"> Please verify that the software of the SERVOPACK being used is a standard software, as determined by the version number. If it is not clear if the software is a standard version or not, please check the version number with a Yaskawa representative. You can verify if the software version is auxiliary function Fn012 of digital operator or built-in panel operator, by using the product information reading function of PC software SigmaWin+ for support. 	
	Constant	<Verification of user constant> <ul style="list-style-type: none"> Please verify the user constant of the SERVOPACK being used. It is necessary to set the electronic gear ratio, due to the fact that the encoder resolution of Σ-7 motor has been improved from Σ-V. Please use the parameter conversion function for converting Σ-V user constant to Σ-7 user constant, available in SigmaWin+. 	
Others	Peripheral equipment	<Verification of noise filter> <ul style="list-style-type: none"> The recommended noise filters for Σ-V and Σ-7 are different. For details, please see the catalogue. 	

1-2. Concept of replacement

The methods for replacing the Σ -V series servo motor/SERVOPACK are as follows.

●Option 1●

Replace all the servo motor /SERVOPACK / motor and encoder cables to Σ -7 series.

●Option 2●

Replace only the servo motor /SERVOPACK and use the existing cables.

This option imposes certain restrictions:

- The protective structure for waterproofing is IP65 for SGM7J and SGM7A (1kW or below).
- The lead direction of encoder cable in SGM7J and SGM7A (1kW or below) is anti-load.

1-3. Replacement list

Replacement of SGMJV with SGM7J (rotational, 200V)

Model currently in use < Σ -V series >		Replacement model < Σ -7 series >		Replacement method		Precautions
SERVOPACK	Servo motor	SERVOPACK	Servo motor	Pattern 1	Pattern 2	
SGDV-R70A	SGMJV-A5A	SGD7S-R70A SGD7W-1R6A	SGM7J-A5A	○	○	In case of pattern 2, the waterproofing protection is IP65 while the lead direction of the encoder cable is anti-load.
SGDV-R90A	SGMJV-01A	SGD7S-R90A SGD7W-1R6A	SGM7J-01C	○	○	
SGDV-1R6A	SGMJV-C2A SGMJV-02A	SGD7S-1R6A SGD7W-1R6A	SGM7J-C2A SGM7J-02A	○	○	
SGDV-2R8A	SGMJV-04A	SGD7S-2R8A SGD7W-2R8A	SGM7J-04A	○	○	
SGDV-5R5A	SGMJV-06A SGMJV-08A	SGD7S-5R5A SGD7W-5R5A	SGM7J-06A SGM7J-08A	○	○	

Replacement of SGM7A and SGMSV with SGM7A (Rotational, 200V)

Model currently in use <Σ-V series >		Replacement model <Σ-7 series >		Replacement method		Precautions
SERVOPACK	Servo motor	SERVOPACK	Servo motor	Pattern 1	Pattern 2	
SGDV-R70A	SGMAV-A5A	SGD7S-R70A SGD7W-1R6A	SGM7A-A5A	○	○	In case of pattern 2, the waterproofing protection is IP65 while the lead direction of the encoder cable is anti-load.
SGDV-R90A	SGMAV-01A	SGD7S-R90A SGD7W-1R6A	SGM7A-01C	○	○	
SGDV-1R6A	SGMAV-C2A SGMAV-02A	SGD7S-1R6A SGD7W-1R6A	SGM7A-C2A SGM7A-02A	○	○	
SGDV-2R8A	SGMAV-04A	SGD7S-2R8A SGD7W-2R8A	SGM7A-04A	○	○	
SGDV-5R5A	SGMAV-06A SGMAV-08A	SGD7S-5R5A SGD7W-5R5A	SGM7A-06A SGM7A-08A	○	○	
SGDV-120A	SGMAV-10A	SGD7S-120A	SGM7A-10A	○	○	
SGDS-120A	SGMSV-10A SGMSV-15A	SGD7S-120A	SGM7A-10A SGM7A-15A	○ ○	× ○	Note: The recommended model for replacement of SGMSV-10A is SGM7A-10A, but the external appearance is different. For details, please refer to the catalogue.
SGDV-180A	SGMSV-20A	SGD7S-180A	SGM7A-20A	○	○	
SGDV-200A	SGMSV-25A SGMSV-30A	SGD7S-200A	SGM7A-30A	○	○	

Replacement of SGM7P with SGM7P (rotational, 200V)

Model currently in use <Σ-V series >		Replacement model <Σ-7 series >		Replacement method		Precautions
SERVOPACK	servo motor	SERVOPACK	servo motor	Pattern 1	Pattern 2	
SGDV-R90A	SGMPS-01A	SGD7S-R90A SGD7W-1R6A	SGM7P-01A	○	○	The cables of SGMPS and SGM7P will be the same (same model).
SGDV-2R8A	SGMPS-02A SGMPS-04A	SGD7S-1R6A SGD7S-2R8A SGD7W-1R6A SGD7W-2R8A	SGM7P-02A SGM7P-04A	○	○	
SGDV-5R5A	SGMPS-08A	SGD7S-5R5A SGD7W-5R5A	SGM7P-08A	○	○	
SGDV-120A	SGMPS-15A	SGD7S-120A	SGM7P-15A	○	○	

Replacement of SGM7G with SGM7G (Rotational, 200V)

Model currently in use <Σ-V series >		Replacement model <Σ-7 series >		Replacement method		Precautions
SERVOPACK	servo motor	SERVOPACK	servo motor	Pattern 1	Pattern 2	
SGDV-3R8A	SGMGV-03A SGMGV-05A	SGD7S-3R8A SFD7W-5R5A	SGM7G-03A SGM7G-05A	○	○

	With holding brake (DC24V)	C	C	

2-2. Characteristics

(1) Without speed reducer

Comparison of SGMJV and SGM7J

Motor capacity	Model Σ-V: SGMJV- Σ-7: SGM7J-	Motor characteristics					
		Rated torque (N·m)		Maximum momentary torque (N·m)		Moment of inertia of rotor (× 10 ⁻⁴ kg·m ²)	
		Σ-V	Σ-7	Σ-V	Σ-7	Σ-V	Σ-7
50W	A5A	0.159		0.557		0.0414 (0.0561)	0.0395 (0.0475)
100W	01A	0.318		1.11		0.0665 (0.0812)	0.0659 (0.0739)
150W	C2A	0.477		1.67		0.0883 (0.103)	0.0915 (0.0995)
200W	02A	0.637		2.23		0.259 (0.323)	0.263 (0.333)
400W	04A	1.27		4.46		0.442 (0.506)	0.486 (0.556)
600W	06A	1.91		6.69		0.667 (0.744)	0.8 (0.87)
750W	08A	2.39		8.36		1.57 (1.74)	1.59 (1.77)

The numerical value within parenthesis pertains to a servo motor with a holding brake.

Comparison of SGMAV and SGM7A

Motor capacity	Model Σ-V: SGMAV- Σ-7: SGM7A-	Motor characteristics					
		Rated torque (N·m)		Maximum momentary torque (N·m)		Moment of inertia of rotor (× 10 ⁻⁴ kg·m ²)	
		Σ-V	Σ-7	Σ-V	Σ-7	Σ-V	Σ-7
50W	A5A	0.159		0.477	0.557	0.0242 (0.0389)	0.0217 (0.0297)
100W	01A	0.318		0.955	1.11	0.038 (0.0527)	0.0337 (0.0417)
150W	C2A	0.477		1.43	1.67	0.0531 (0.0678)	0.0458 (0.0538)
200W	02A	0.637		1.91	2.23	0.116 (0.18)	0.139 (0.209)
400W	04A	1.27		3.82	4.46	0.19 (0.254)	0.216 (0.286)
600W	06A	1.75	1.91	5.25	6.69	0.326 (0.403)	0.315 (0.385)
750W	08A	2.39		7.16	8.36	0.769 (0.94)	0.775 (0.955)
1.0kW	10A	3.18		9.55	11.1	1.2 (1.41)	0.971 (1.15)

The numerical value within parenthesis pertains to a servo motor with a holding brake.

Comparison of SGMSV and SGM7A

Motor capacity	Model Σ-V: SGMSV- Σ-7: SGM7A-	Motor characteristics					
		Rated torque (N·m)		Maximum momentary torque (N·m)		Moment of inertia of rotor (×10 ⁻⁴ kg·m ²)	
		Σ-V	Σ-7	Σ-V	Σ-7	Σ-V	Σ-7
1.0kW	10A	3.18		9.54	11.1	1.74 (1.99)	0.971 (1.15)
1.5kW	15A	4.9		14.7		2 (2.25)	
2.0kW	20A	6.36		19.1		2.47 (2.72)	
2.5kW	25A	7.96		23.9		3.19 (3.44)	
3.0kW	30A	9.8		29.4		7 (9.2)	

The numerical value within parenthesis pertains to a servo motor with a holding brake.

Comparison of SGMP5 and SGM7P (there are no parts that differ from Σ-V)

Motor capacity	Model Σ-V: SGMP5- Σ-7: SGM7P-	Motor characteristics					
		Rated torque (N·m)		Maximum momentary torque (N·m)		Moment of inertia of rotor (×10 ⁻⁴ kg·m ²)	
		Σ-V	Σ-7	Σ-V	Σ-7	Σ-V	Σ-7
100W	01A	0.318		0.955		0.0592 (0.0892)	
200W	02A	0.637		1.91		0.263 (0.415)	
400W	04A	1.27		3.82		0.409 (0.561)	
750W	08A	2.39		7.16		2.1 (2.98)	
1.5kW	15A	4.77		14.3		4.02 (4.9)	

The numerical value within parenthesis pertains to a servo motor with a holding brake.

Comparison of SGMGV and SGM7G

Motor capacity	Model Σ-V: SGMGV- Σ-7: SGM7G-	Motor characteristics					
		Rated torque (N·m)		Maximum momentary torque (N·m)		Moment of inertia of rotor (×10 ⁻⁴ kg·m ²)	
		Σ-V	Σ-7	Σ-V	Σ-7	Σ-V	Σ-7
300W	03A	1.96		5.88		2.48 (2.73)	
450W	05A	2.86		8.92		3.33 (3.58)	
850W	09A	5.39		13.8	14.2	13.9 (16)	
1.3kW	13A	8.34		23.3		19.9 (22)	
1.8kW	20A	11.5		28.7		26 (28.1)	

The numerical value within parenthesis pertains to a servo motor with a holding brake.

(2) With speed reducer

Comparison of SGMJV and SGM7J

Motor capacity	Motor model Σ-V: SGMJV- Σ-7: SGM7J-	Speed reduction ratio	Speed reducer output				Moment of inertia ($\times 10^{-4}$ kg·m ²)			
			Rated torque /efficiency *		Maximum momentary torque [N·m]	Motor * +speed reducer				
			[N·m/%]			In case of shaft output		In case of flange output

Input-output signal cable					
Connector kit (for CN1)	Analog voltage/pulse string command type; Single shaft type	-	JZSP-CS19-1-E		ハンダ付けタイプ 
	MECHATROLINK-II communication command type; Single shaft type		JZSP-CS19-2-E		
	MECHATROLINK-III communication command type; Single shaft type		-	JZSP-CS19-3-E	
Connector terminal conversion unit	Analog voltage/pulse string command type; Single shaft type	0.5m	JUSP-TA50PG-E		
		1m	JUSP-TA50PG-1-E		
		2m	JUSP-TA50PG-2-E		
	MECHATROLINK-II communication command type; Single shaft type	0.5m	JUSP-TA26P-E		
		1m	JUSP-TA26P-1-E		
		2m	JUSP-TA26P-2-E		
	MECHATROLINK-III communication command type; 2-shaft type	0.5m	-	JUSP-TA36P-E	
		1m	-	JUSP-TA36P-1-E	
		2m	-	JUSP-TA36P-2-E	
Single side lead	Analog voltage/pulse string command type; Single shaft type	1m	JZSP-CS101-1-E		
		2m	JZSP-CS101-2-E		
		3m	JZSP-CS101-3-E		
	MECHATROLINK-II communication command type; Single shaft type	1m	JZSP-CS102-1-E		
		2m	JZSP-CS102-2-E		
	MECHATROLINK-III communication command type; Single shaft type	3m	JZSP-CS102-3-E		
	MECHATROLINK-III communication command type; 2-shaft type	1m	-	JZSP-CS103-1-E	
		2m	-	JZSP-CS103-2-E	
		3m	-	JZSP-CS103-3-E	
Digital operator	Analog voltage/pulse string command type; Single shaft type	-	JUSP-OP05A-1-E		
	MECHATROLINK-II communication command type; Single shaft type				
	MECHATROLINK-III communication command type; Single shaft type				
	MECHATROLINK-III communication command type; 2-shaft type				
Digital operator conversion cable	Analog voltage/pulse string command type; Single shaft type	0.3m	JZSP-CVS05-A3-E		JZSP-CVS05 JZSP-CVS07 
	MECHATROLINK-II communication command type; Single shaft type				
	MECHATROLINK-III communication command type; Single shaft type				
	MECHATROLINK-III communication command type; 2-shaft type		-	JZSP-CVS05-A3-E JZSP-CVS07-A3-E	
Analog monitor cable	Analog voltage/ pulse string command type; Single shaft type	1m	JZSP-CA01-E		
	MECHATROLINK-II communication command type; Single shaft type				
	MECHATROLINK-III communication command type; Single shaft type				
	MECHATROLINK-III communication command type; 2-shaft type		-		
PC connection cable	Analog voltage/ pulse string command type; Single shaft type	2.5m	JZSP-CVS06-02-E		
	MECHATROLINK-II communication command type; Single shaft type				
	MECHATROLINK-III communication command type; Single shaft type				
	MECHATROLINK-III communication command type; 2-shaft type		-		
Safety connection cable	Analog voltage/ pulse string command type; Single shaft type	1m 3m	JZSP-CVH03-01-E JZSP-CVH03-03-E		
	MECHATROLINK-II communication command type; Single shaft type				
	MECHATROLINK-III communication command type; Single shaft type				
	MECHATROLINK-III communication command type; 2-shaft type		-

(4) Peripheral equipment

Battery

Name	Model	
	Σ-V	Σ-7
Battery	JZSP-BA01 (equivalent to ER6V C3N)	
Battery unit	JUSP-BA01-E	

Brake power

Name	Input voltage	Model	
		Σ-V	Σ-7
Brake power (DC24V)		Set up by customer	

Noise filter

Input voltage	Servo capacity /current indication	Model	
		Σ-V	Σ-7S
AC single-phase 200V	50W/R70	FN2070-6/07	HF2010A-UPF
	100W/R90		
	200W/1R6		
	400W/2R8	FN2070-10/07	
	750W/5R5	FN2070-16/07	HF2020A-UPF
	1.5kW/120	FN350-30/33	HF2030A-UPF
AC 3-phase 200V	50W/R70	FN258L-7/07	HF3010C-SZC
	100W/R90		
	200W/1R6		
	400W/2R8		
	500W/3R8		
	750W/5R5	FN258L-16/07	HF3020C-SZC
	1.0kW/7R6		
	1.5kW/120		
	2.0kW/180		HF3020C-UQC
	3.0kW/200		HF3030C-UQC

Surge absorber

Input voltage	Servo capacity /current indication	Model	
		Σ-V	Σ-7
AC single-phase 200V	50W/R70		LT-C12G801WS
	100W/R90		
	200W/1R6		
	400W/2R8		
	750W/5R5		
AC 3-phase 200V	50W/R70		LT-C32G801WS
	100W/R90		
	200W/1R6		
	400W/2R8		
	500W/3R8		
	750W/5R5		
	1.0kW/7R6		
	1.5kW/120		
	2.0kW/180		
3.0kW/200			

DC reactor

Input voltage	Servo capacity /current indication	Model	
		Σ-V	Σ-7
AC 3-phase 200V	50W/R70	X5061	
	100W/R90		
	200W/1R6		
	400W/2R8		
	500W/3R8		
	750W/5R5		
	1.0kW/7R6	X5060	
	1.5kW/120		
	2.0kW/180		
3.0kW/200	X5059		

Magnetic contactor

Input voltage	Servo capacity /current indication	Model	
		Σ-V	Σ-7
AC200V	50W/R70		SC-03
	100W/R90		
	200W/1R6		
	400W/2R8		
	500W/3R8		
	750W/5R5	SC-4-1	
	1.0kW/7R6		
	1.5kW/120		
	2.0kW/180	SC-5-1	
3.0kW/200			

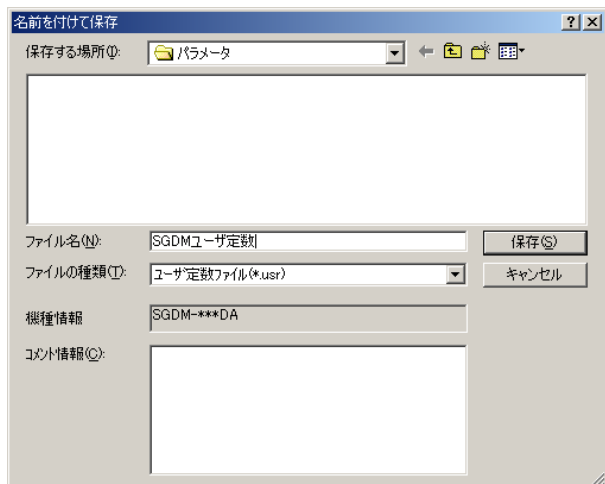

CN8 jumper connector

Name	Model	
	Σ-V	Σ-7
CN8 jumper connector	JZSP-CVH05-E	

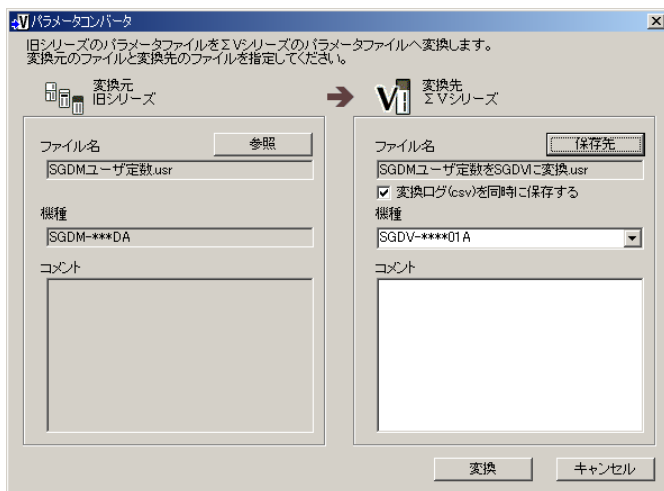

5. Parameter convertor

The user constant of the Σ -V series SERVOPACK can be automatically converted to the parameters of the Σ -7 SERVOPACK by using the parameter convertor, available in the Sigma-7 component of the engineering tool SigmaWin+ Ver.5.70, and later versions. The procedure is described below.

- ① Open the SigmaV component of SigmaWin+ and verify and save the user constant of Σ -V SERVOPACK. If you have already taken the user constant file from the SERVOPACK, please use it.

- ② Open the Sigma7 component and run the parameter convertor.

- ③ Specify the previously saved user constant file of Σ -V SERVOPACK in the names of file to be converted.
- ④ Specify the location for saving the converted file.

(Continued on next page)

- ⑤ Upon clicking the conversion button, the conversion process will start. The points to be noted are highlighted.

[Example of parameter convertor screen]

- ⑥ To write the conversion result in the SERVOPACK, connect online with the target SERVOPACK and press the "write on servo" button in the parameter edit screen.

Precautions concerning use of the parameter convertor:

- The resolution of the encoder will change when used in position control mode. Therefore, change the upper order command or change the setting of the electronic gear.
- There is no function for converting the parameter from SGD V 2 shaft to SGD7W. Convert the parameters of each shaft once to SGD7S parameter, and import the parameter to SGD7W.
