

Build America, Buy America Act (BABA) Certification

September 30, 2025

To Whom It May Concern,

This letter serves as formal certification that the variable frequency drive (VFD) configured systems listed below are fully compliant with the requirements of the Build America, Buy America Act (BABA), as established under the Infrastructure Investment and Jobs Act (IIJA).

Yaskawa America, Inc. certifies that the following standard product families, when purchased as configured drive systems from Yaskawa's published catalog offering, are manufactured in the United States and meet the domestic content thresholds required by BABA guidance:

- GA800 Configured Drives – Compliant part numbers begin with G8C
- FP605 Configured Drives – Compliant part numbers begin with F6C and F6B
- U1000 Configured Drives – Compliant part numbers begin with U1E
- HV600 Configured Drives – Compliant part numbers begin with H6C, H6B, and H6R
- Z1000U Configured Drives – Compliant part numbers begin with Z1D and Z1E

These configured drives are assembled at our facility in Franklin, Wisconsin, using components that meet or exceed the minimum percentage of U.S.-sourced content as required under current BABA guidelines. All serial numbers will begin with 4W.

Each of the configured systems listed above is deemed to satisfy BABA provisions for infrastructure projects receiving federal financial assistance, including those administered by the Federal Transit Administration (FTA), Federal Highway Administration (FHWA), and other related agencies.

If you have any questions or require additional documentation, please contact me at the address or phone number listed below
