

USA STRONG. GLOBALLY PROVEN.

MADE IN THE USA.

We manufacture Yaskawa variable frequency drives at our own facilities in Illinois and Wisconsin using U.S. and global components.

We maintain extensive inventory right here in the U.S., ensuring immediate access to the products you need to keep your projects on schedule and on budget.

Most models meet Build America, Buy America (BABA) requirements.

All Yaskawa drives comply with the Trade Agreements Act (TAA) ensuring government contract eligibility and global trade standards.

BABA COMPLIANT.

Yaskawa America **minimizes supply risk** and **cost surprises** by maximizing local sourcing and maintaining a **deep inventory** of trusted variable frequency drives—**designed and built right here in the USA.**

RIGOROUS TESTING.

Every single Yaskawa drive is rigorously tested on a motor before it leaves our factory to ensure the industry's highest standards for performance and reliability.

Yaskawa designs and builds every drive that carries our name. There is no 3rd party hardware behind our badge.

AUTHENTIC.

Yaskawa is the only manufacturer in our field globally recognized for reaching the highest standards in product quality — honored with the prestigious Deming Prize. Our drives, motion systems, and robotics are trusted worldwide for **unmatched reliability and long-term performance.**
