

**Now Available  
120V Digital Interface (DI-101) for A1000 Drive**

**To: Channel Partners, HQ Distributors, Canadian Distributors,  
Manufacturer Representatives, Yaskawa Field Sales and Associates**

Yaskawa America, Inc. is pleased to release DI-101, a new 120V digital input control option for the A1000 Variable Speed Drive.

**Product Description**

The DI-101 is a 120VAC Logic Interface (8-input), and mounts directly to the control terminal block on the A1000 drive, allowing the use of 120 VAC control logic circuits to produce multi-function control input signals for the drive. For additional technical detail, see tech manual [TOEPYEAOPT07](#).

**Pricing and Availability**

The DI-101 is in stock and ready to ship. List price is \$185, and your distributor multiplier is the same as other A1000 control options. In the near future, the A1000 price book and Quote Wizard will be updated to include this important option.

Thank you for your continued sales efforts.

Sincerely,
