About this Manual

This document provides the information needed for replacing the old product with the new one, assuming the following cases.

- Preventative maintenance of SERVOPACKs and servomotors
- Corrective maintenance of SERVOPACK or servomotor (failure)

This document consists of two parts.

- Part 1: Replacement of the Σ -7-series products (hereinafter called Σ -7 series) with the Σ -X-series products (hereinafter called Σ -X series).
- Part 2: Replacement of the Σ -V-series products (hereinafter called Σ -V series) with the Σ -X series.

Depending on the operating conditions and specific application of the equipment, it may be necessary to consider items not contained in this document, and so address other items by referring to the user's manual or catalog for the product that is being used.

Important

The following replacements are not described in this manual.

- Using the old rotary servomotors and replacing only with the Σ -X-series SERVOPACKs.
- Replacing with the Σ -X-series rotary servomotor with reduction gear.

For more information, contact your Yaskawa representative.

Related Documents

The relationships between the documents that are related to the servo drives are shown in the following figure. The numbers in the figure correspond to the numbers in the table on the following pages. Refer to these documents as required.

Using This Manual

◆ Trademarks

- EtherCAT is a registered trademark of and patented technology licensed by Beckhoff Automation GmbH, Germany.
- Safety over EtherCAT is a registered trademark of and patented technology licensed by Beckhoff Automation GmbH, Germany.
- Σ-LINK is a trademark of the MECHATROLINK Members Association.
- Other product names and company names are the trademarks or registered trademarks of the respective company. “TM” and the ® mark do not appear with product or company names in this manual.

◆ Visual Aids

The following aids are used to indicate certain types of information for easier reference.

Indicates precautions or restrictions that must be observed.
Also indicates alarm displays and other precautions that will not result in machine damage.

Indicates definitions of difficult terms or terms that have not been previously explained in this manual.

Information

Indicates supplemental information to deepen understanding or useful information.

Safety Precautions

◆ Safety Information

To prevent personal injury and equipment damage in advance, the following signal words are used to indicate safety precautions in this document. The signal words are used to classify the hazards and the degree of damage or injury that may occur if a product is used incorrectly. Information marked as shown below is important for safety. Always read this information and heed the precautions that are provided.

DANGER

- Indicates precautions that, if not heeded, are likely to result in loss of life, serious injury, or fire.

◆ Safety Precautions That Must Always Be Observed

■ General Precautions

DANGER

- Read and understand this manual to ensure the safe usage of the product.
- To ensure the safe usage of the product, be sure to read and follow the instructions in the manual and accompanying materials for the product that is being used.

Revision History

Part 1: Σ -7 Series $\rightarrow$ Σ -X Series

Introduction

1

This chapter describes the flow of operations for replacing a system that uses the Σ -7 series with the Σ -X series and the eligible models for replacement.

1.1 Table of Servomotor and SERVOPACK Replacements ..1-2

1.2 Flow of Replacement Operations 1-4

1.1

Table of Servomotor and SERVOPACK Replacements

The following table shows the combinations of Σ -7-series servomotors and SERVOPACKs and their replacement combinations in the Σ -X series. Combinations that do not have any replacement in the Σ -X series are not listed.

To verify the detailed compatibility, refer to the following sections.

1.2 Flow of Replacement Operations

This document describes how to replace servomotors, SERVOPACKs, cables, and peripheral devices from the Σ -7 series with those in the Σ -X series.

The operation flow for replacing the Σ -7 series with the Σ -X series is as follows.

Step	Item	Description
1	Selecting the replacement model	 1.1 Table of Servomotor and SERVOPACK Replacements on page 1-2
2	Checking the system before replacement	To replace the servomotor and the SERVOPACK, check the following points. • How is the servomotor mounted in the machine? • How is it wired (e.g., racks, pits, piping)? • Information on devices in the control panel (e.g., check the capacity of circuit breakers, etc.) Refer to the following chapters for details on the check points.  7.1 Checksheet for Replacing the Σ-7 series with the Σ-X series on page 7-2
3	Checking the specifications of the servomotor	 Chapter 2 Specifications of Servomotor
4	Checking the specifications of the SERVOPACK	 Chapter 3 Specifications of SERVOPACK
5	Checking the specifications of the peripheral devices	 Chapter 4 Specifications of Peripheral Devices
6	Making settings for replacement	 Chapter 5 Making Settings for Replacement
7	Replacing the peripheral devices	—
8	Replacing the servomotor	For details on the installation procedure for the servomotor, refer to the product manual for the replacement (new) servomotor.
9	Replacing the SERVOPACK	For details on the installation procedure for the SERVOPACK, refer to the product manual for the replacement (new) SERVOPACK.
10	Operation check after replacement	 Chapter 6 Operation Check After Replacement

Specifications of Servomotor

2.3.7	SGM7A-15 to -25 and SGMXA-15 to -25	2-35
2.3.8	SGM7A-30 to -50 and SGMXA-30 to -50	2-40
2.3.9	SGM7A-70 and SGMXA-70	2-45
2.3.10	SGM7P-01 to -04 and SGMXP-01 to -04	2-49
2.3.11	SGM7P-08, -15 and SGMXP-08, -15	2-52
2.3.12	SGM7G-03, -05 and SGMXG-03, -05	2-55
2.3.13	SGM7G-09 to -20 and SGMXG-09 to -20	2-59
2.3.14	SGM7G-30 to -75 and SGMXG-30 to -75	2-64
2.3.15	SGM7G-1A to -1E and SGMXG-1A to -1E	2-70

2.1 Servomotor Model Comparison Charts

This section provides the model numbers of Σ -7-series and Σ -X-series.

2.1.1 SGM7J and SGMXJ

SGM7J -

(1) (2) (3) (4) (5) (6)

SGMXJ -

(1) (2) (3) (4) (5) (6) (7) (8)

No.	Item		Σ -7 SGM7J-	Σ -X SGMXJ-
(1)	Rated output	50 W	A5	
		100 W	01	
		150 W	C2	
		200 W	02	
		400 W	04	
		600 W	06	
		750 W	08	
(2)	Power supply voltage	200 VAC	A	
(3)	Serial encoder	24-bit batteryless absolute	6	–
		24-bit absolute	7	–
		24-bit incremental	F	–
		26-bit absolute	–	U
		26-bit batteryless absolute	–	W
(4)	Design revision order		A	
(5)	Shaft end	Straight without key	2	
		Straight with key and tap	6	
		With two flat seats	B	
(6)	Option	Without options	1	
		With holding brake (24 VDC)	C	
		With oil seal and holding brake (24 VDC)	E	
		With oil seal	S	
(7)	Destination		–	A
(8)	Ancillary specifications	Standard specifications	–	1
		Σ -7 compatible specifications	–	2

2.1.2 SGM7A and SGMXA

SGM7A - □□ □ □ □ □ □
(1) (2) (3) (4) (5) (6)

SGMXA - □□ □ □ □ □ □ □ □
(1) (2) (3) (4) (5) (6) (7) (8)

No.	Item		Σ-7 SGM7A-	Σ-X SGMXA-
(1)	Rated output	50 W	A5	
		100 W	01	
		150 W	C2	
		200 W	02	
		400 W	04	
		600 W	06	
		750 W	08	
		1.0 kW	10	
		1.5 kW	15	
		2.0 kW	20	
		2.5 kW	25	
		3.0 kW	30	
		4.0 kW	40	
		5.0 kW	50	
		7.0 kW	70	
(2)	Power supply voltage	200 VAC	A	
(3)	Serial encoder	24-bit batteryless absolute	6	–
		24-bit absolute	7	–
		24-bit incremental	F	–
		26-bit absolute	–	U
		26-bit batteryless absolute	–	W
(4)	Design revision order	Standard	A	
(5)	Shaft end	Straight without key	2	
		Straight with key and tap	6	
		With two flat seats	B* ¹	
(6)	Option* ²	Without options	1	
		With holding brake (24 VDC)	C	
		With oil seal and holding brake (24 VDC)	E	
		With oil seal	S	
(7)	Destination		–	A
(8)	Ancillary specifications	Standard specifications	–	1
		Σ-7 compatible specifications	–	2

*1. Code B indicates a 1.5-kW or higher model is not supported.

*2. There are no models with a holding brake for the 7.0 kW.

2.1.3 SGM7P and SGMXP

SGM7P - □□ □ □ □ □ □
 (1) (2) (3) (4) (5) (6)

SGMXP - □□ □ □ □ □ □ □ □
 (1) (2) (3) (4) (5) (6) (7) (8)

No.	Item		Σ-7 SGM7P-	Σ-X SGMXP-
(1)	Rated output	100 W	01	
		200 W	02	
		400 W	04	
		750 W	08	
		1.5 kW	15	
(2)	Power supply voltage	200 VAC	A	
(3)	Serial encoder	24-bit batteryless absolute	6	–
		24-bit absolute	7	–
		24-bit incremental	F	–
		26-bit absolute	–	U
		26-bit batteryless absolute	–	W
(4)	Design revision order	IP65	A	–
		IP67	E	–
		Standard*	–	A
(5)	Shaft end	Straight without key	2	
		Straight with key and tap	6	
(6)	Option	Without options	1	
		With holding brake (24 VDC)	C	
		With oil seal and holding brake (24 VDC)	E	
		With oil seal	S	
(7)	Destination		–	A
(8)	Ancillary specifications	Standard specifications	–	1
		Σ-7 compatible specifications	–	2

* The standard specification is IP67.

2.1.4 SGM7G and SGMXG

SGM7G- □□ □ □ □ □ □
(1) (2) (3) (4) (5) (6)

SGMXG- □□ □ □ □ □ □ □ □
(1) (2) (3) (4) (5) (6) (7) (8)

No.	Item		Σ-7 SGM7G-	Σ-X SGMXG-
(1)	Rated output	300 W	03	
		450 W	05	
		850 W	09	
		1.3 kW	13	
		1.8 kW	20	
		2.9 kW	30* ¹	
		4.4 kW	44	
		5.5 kW	55	
		7.5 kW	75	
		11 kW	1A	
		15 kW	1E	
(2)	Power supply voltage	200 VAC	A	
(3)	Serial encoder	24-bit batteryless absolute	6	–
		24-bit absolute	7	–
		24-bit incremental	F	–
		26-bit absolute	–	U
		26-bit batteryless absolute	–	W
(4)	Design Revision Order	Standard	A	
(5)	Shaft end	Straight without key* ²	2	
		Straight with key and tap	6	
		Straight without key and with tap* ³	–	8
(6)	Option	Without options	1	
		With holding brake (24 VDC)	C	
		With oil seal and holding brake (24 VDC)	E	
		With oil seal	S	
(7)	Destination		–	A
(8)	Ancillary specifications	Standard specifications	–	1
		Σ-7 compatible specifications	–	2

*1. The rated output is 2.4 kW if you combine the SGM□G-30A servomotor with the SGD□S-200A SERVOPACK.

*2. In the Σ-X series, only SGMXG-03 to -20 servomotors are available with this shaft end.

*3. Only SGMXG-30 to -1E servomotors are available with this shaft end.

2.2 Comparison of Servomotor Characteristics

The following table compares the characteristics of the Σ -7-series servomotor and the Σ -X-series servomotor.

2.2.1 SGM7J and SGMXJ

Ratings

Model Σ -7: SGM7J- Σ -X: SGMXJ-	Servomotor Capacity	Rated Torque ^{*1,*2} (N·m)		Instantaneous Maximum Torque ^{*1} (N·m)		Rotor Moment of Inertia ($\times 10^{-4}$ kg·m ²)			
		Σ -7	Σ -X	Σ -7	Σ -X	Standard		With a Batteryless Absolute Encoder	
						Σ -7	Σ -X	Σ -7	Σ -X
A5	50 W	0.159		0.557		0.0395 (0.0475)	0.0421 (0.0501)	0.0410 (0.0490)	0.0458 (0.0538)
01	100 W	0.318		1.11		0.0659 (0.0739)	0.0669 (0.0749)	0.0674 (0.0754)	0.0706 (0.0786)
C2	150 W	0.477		1.67		0.0915 (0.0995)	0.0946 (0.103)	0.0930 (0.1010)	0.0983 (0.107)
02	200 W	0.637		2.23		0.263 (0.333)	0.263 (0.323)	0.264 (0.334)	0.267 (0.327)
04	400 W	1.27		4.46		0.486 (0.556)	0.486 (0.546)	0.487 (0.557)	0.490 (0.550)
06	600 W	1.91		6.69		0.800 (0.870)	0.800 (0.860)	0.801 (0.871)	0.804 (0.864)
08	750 W	2.39		8.36		1.59 (1.77)	1.59 (1.76)	1.59 (1.77)	1.59 (1.76)

*1. These values are for operation in combination with a SERVOPACK when the temperature of the armature winding is 100°C. The values for other items are at 20°C. These are typical values.

*2. The rated torques are the continuous allowable torque values at an ambient operating temperature of 40°C with an aluminum heat sink of the following dimensions.
Capacity 50 W, 100 W: 200 mm $\times$ 200 mm $\times$ 6 mm, capacity 150 W to 750 W: 250 mm $\times$ 250 mm $\times$ 6 mm

Note: The values in parentheses are for servomotors with holding brakes.

Torque - Rotation Speed Characteristics

Continued on next page.

Continued from previous page.

Continued on next page.

2.2 Comparison of Servomotor Characteristics

2.2.2 SGM7A and SGMXA

Continued from previous page.

*1. The characteristics are the same for a single-phase 200-V and single-phase 100-V input.

*2. The characteristics are the same for three-phase 200-V and single-phase 200-V input.

Note: 1. These values (typical values) are for operation in combination with a SERVOPACK when the temperature of the armature winding is 100°C.

2. The characteristics in the intermittent duty zone depend on the power supply voltage.

3. If the effective torque is within the allowable range for the rated torque, the servomotor can be used within the intermittent duty zone.

4. If you use a servomotor main circuit cable that exceeds 20 m, the intermittent duty zone will become smaller because the voltage drop increases.

2.2.2 SGM7A and SGMXA

Ratings

Model Σ -7: SGM7A- Σ -X: SGMXA-	Servomotor Capacity	Rated Torque ^{*1,*2} (N·m)		Instantaneous Maximum Torque ^{*1} (N·m)		Rotor Moment of Inertia ($\times 10^{-4}$ kg·m ²)

4. If you use a servomotor main circuit cable that exceeds 20 m, the intermittent duty zone will become smaller because the voltage drop increases.

2.2.4 SGM7G and SGMXG

Ratings

Model Σ-7: SGM7G- Σ-X: SGMXG-	Servomotor Capacity	Rated Torque ^{*1, *2} (N·m)		Instantaneous Maximum Torque ^{*1} (N·m)		Rotor Moment of Inertia (×10 ⁻⁴ kg·m ²)			
						Standard		With a Batteryless Absolute Encoder	
		Σ-7	Σ-X	Σ-7	Σ-X	Σ-7	Σ-X	Σ-7	Σ-X
03	300 W	1.96		5.88				2.48 (2.73)	
05	450 W	2.86		8.92				3.33 (3.58)	
09	850 W	5.39		14.2	14.2 20.0 ^{*3}			13.9 (16.0)	
13	1.3 kW	8.34		23.3	23.3 30.0 ^{*4}			19.9 (22.0)	
20	1.8 kW	11.5		28.7	28.7 35.4 ^{*5}			26.0 (28.1)	
30	2.9 kW 2.4 kW ^{*6}	18.6 15.1 ^{*6}		54.0 45.1 ^{*6}	54.0 45.1 ^{*6} 66.8 ^{*7}			46.0 (53.9)	
44	4.4 kW	28.4		71.6	71.6 95.6 ^{*8}			67.5 (75.4)	
55	5.5 kW	35.0		102	102 134 ^{*9}			89.0 (96.9)	
75	7.5 kW	48.0		119	119			125 (133)	
1A	11 kW	70.0		175				242 (261)	
1E	15 kW	95.4		224				303 (341)	

*1. These values are for operation in combination with a SERVOPACK when the temperature of the armature winding is 20°C. These are typical values.

*2. The rated torques are the continuous allowable torque values with an aluminum or steel heat sink of the following dimensions.
Capacity 300 W, 450 W: 250 mm × 250 mm × 6 mm (aluminum), capacity 850 W to 1.8 kW: 400 mm × 400 mm × 20 mm (iron), capacity 2.9 kW (2.4 kW) to 7.5 kW: 550 mm × 550 mm × 30 mm (iron), capacity 11 kW to 15 kW: 650 mm × 650 mm × 35 mm (iron)

*3. This is the value when combined with the SERVOPACK SGDXS-120A.

*4. This is the value when combined with the SERVOPACK SGDXS-180A.

*5. This is the value when combined with the SERVOPACK SGDXS-200A.

*6. This is the value when combined with the SERVOPACK SGD□S-200A.
Servomotor output is limited by the rated current and maximum current of the used SERVOPACK.
The load ratio is calculated based on the servomotor's rated current of 24.5 Arms.
Use the servomotor at a load ratio of 80% or less.

*7. This is the value when combined with the SERVOPACK SGDXS-470A.

*8. This is the value when combined with the SERVOPACK SGDXS-550A.

*9. This is the value when combined with the SERVOPACK SGDXS-780A.

Note: The values in parentheses are for servomotors with holding brakes.

Torque - Rotation Speed Characteristics

Continued on next page.

Continued from previous page.

2.2 Comparison of Servomotor Characteristics

2.2.4 SGM7G and SGMXG

Continued from previous page.

*1. The SGM7G-09A and -13A can use a single-phase power input in combination with the SGD7S-120A□□A008.

*2. The SGMXG-09A and -13A can use a single-phase power input in combination with the SGDXS-120A□□A0008.

*3. If you operate the SGM7G-75A Servomotor (with holding brake) continuously at the maximum motor speed of 3000 min⁻¹, use an output torque of 14.4 N•m (30% of rated torque) or less.

Note: 1. These values (typical values) are for operation in combination with a SERVOPACK when the temperature of the armature winding is 20°C.

2. The characteristics in the intermittent duty zone depend on the power supply voltage.

3. If the effective torque is within the allowable range for the rated torque, the servomotor can be used within the intermittent duty zone.

4. If you use a servomotor main circuit cable that exceeds 20 m, the intermittent duty zone will become smaller because the voltage drop increases.

2.3

Servomotor External Dimensions and Installation Dimensions

2.3.1

SGM7J-A5 to -C2 and SGMXJ-A5 to -C2

- SGM7J, SGMXJ-□□□□□□□2 (Σ-7 compatible specifications)

- SGMXJ-□□□□□□□1 (standard specifications)

The following table shows external dimensions and installation dimensions of servomotors.

Note: 1. The values in parentheses are for servomotors with holding brakes.

2. The values for a straight, without key specification are given.

Servo-motor Capacity	Model	L*	LL*	LM	Flange Dimensions							S	MD	MW	MH	ML	Approx. Mass [kg]*
					LR	LE	LG	LC	LA	LB	LZ						
50 W	SGM7J-A5A□A2□	81.5 (122.0)	56.5 (97.0)	37.9													0.3 (0.6)
	SGMXJ-A5A□A2□A2	80.5 (121.0)	55.5 (96.0)	37.5									8.8	25.8	14.7	16.1

* For models that have a batteryless absolute encoder, KB2 is 8 mm greater than the given value. Refer to the following section for the values for individual models.

Servomotor Capacity	Model	KB2
7.0 kW	SGM7A-70A6A2□	269
	SGMXA-70AWA2□A□	

Cooling Fan Specifications

The cooling fan specifications for the Σ -7 series and Σ -X series are identical.

- Single-phase, 220 V
- 50 Hz/60 Hz
- 17 W/15 W
- 0.11 A/0.09 A

Specifications of Fan Operation Error Detector

Only the Σ -7 series features the fan operation error detector.

- Contact capacity maximum allowable voltage: 350 V (AC/DC)
Maximum allowable current: 120 mA (AC/ DC)
Maximum controllable power: 360 mW
- Alarm contacts ON for normal fan rotation.
OFF at $1680 \pm 100 \text{ min}^{-1}$ max.
OFF for 3 seconds at startup.

Shaft End Specifications

The specifications of the shaft ends for the Σ -7 series and Σ -X series are identical.

Connector Mounting Dimensions

◆ For Encoders

• Σ -7 Series and Σ -X Series (Σ -7 compatible specifications)

* A battery is required only for an absolute encoder.

< Σ -7 series>

Receptacle: CM10-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

< Σ -X series>

Receptacle: CMV1-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug,
CMV1-AP10S-□-D for right-angle plug, CMV1-SP10S-□-D for straight plug,
CMV1S-AP10S-□-D for right-angle plug, CMV1S-SP10S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

- Σ -X Series (standard specifications)

The following figures show the installation direction of the encoder cable.

◆ For Servomotors

The specifications of the connectors for the Σ -7 series and Σ -X series are identical.

• Without Holding Brakes

PE	FG (frame ground)	3	Phase U
5	–	2	Phase V
4	–	1	Phase W

Manufacturer: Japan Aviation Electronics Industry, Ltd.

• With Holding Brakes

PE	FG (frame ground)	3	Phase U
5	Brake terminal	2	Phase V
4	Brake terminal	1	Phase W

Manufacturer: Japan Aviation Electronics Industry, Ltd.

- 3.3.10 SGD□S-590A, -780A 3-23

3.4 Mounting Hole Dimensions 3-25

3.1 SERVOPACK Model Comparison Charts

Check the Σ -X-series SERVOPACK model that will replace the Σ -7-series SERVOPACK model that is being used.

SGD7S - $\frac{\square\square\square}{(1)} \frac{\square}{(2)} \frac{\square\square}{(3)} \frac{\square}{(4)}$

SGDXS - $\frac{\square\square\square}{(1)} \frac{\square}{(2)} \frac{\square\square}{(3)} \frac{\square}{(4)}$

No.	Item			SGD7S-	SGDXS-
(1)	Maximum applicable motor capacity	Three-phase, 200 VAC	0.05 kW	R70 ^{*1}	
			0.1 kW	R90 ^{*1}	
			0.2 kW	1R6 ^{*1}	
			0.4 kW	2R8 ^{*1}	
			0.5 kW	3R8	
			0.75 kW	5R5 ^{*1}	
			1.0 kW	7R6	
			1.5 kW	120 ^{*2}	
			2.0 kW	180	
			3.0 kW	200	
			5.0 kW	330	
			6.0 kW	470	
			7.5 kW	550	
			11 kW	590	
			15 kW	780	
(2)	Voltage		200 VAC	A	
			100 VAC	F	—
(3)	Interface ^{*3}		EtherCAT communications reference	A0	
(4)	Design revision order		Standard	A	

*1. These models can be used with either a single-phase or three-phase input.

*2. The models with a single-phase, 200-VAC power supply input (SGD7S-120AA0A008, SGDXS-120AA0A0008) are available as a hardware option specification.

*3. The same SERVOPACKs are used for both rotary servomotors and linear servomotors.

3.2

SERVOPACK Connector Terminal Compatibility

The pin assignments for the terminal blocks of the Σ -7 series and Σ -X series are identical.

The following SERVOPACKs require the included power supply connector. (The power supply connector included with the Σ -7-series SERVOPACKs can also be used with the Σ -X-series SERVOPACKs.)

- SGD□S-R70A, -R90A, -1R6A, -2R8A, -3R8A, -5R5A, -7R6A, -120A

3.2.1

Terminal Symbols and Terminal Names

The terminal symbols and terminal names for the Σ -7 series and Σ -X series are identical.

- Three-Phase, 200-VAC Power Supply Input

Terminal Symbols	Terminal Name	Specification	
L1, L2, L3	Main circuit power input terminals for AC power input	Three-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz	
L1C, L2C	Control main circuit terminals	AC input	Single-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz
		DC input	L1C: 270 VDC to 324 VDC, -15% to +10%, L2C: 0 VDC or L2C: 270 VDC to 324 VDC, -15% to +10%, L1C: 0 VDC
B1/⊕, B2, B3	Regenerative resistor terminals	• SGD□S-R70A, -R90A, -1R6A, -2R8A If the regenerative capacity is insufficient, connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		• SGD□S-3R8A, -5R5A, -7R6A, -120A, -180A, -200A, -330A If the internal regenerative resistor is insufficient, remove the lead or short bar between B2 and B3 and connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		• SGD□S-470A, -550A Connect a regenerative resistor unit between B1/⊕ and B2. Obtain a regenerative resistor unit separately. These models do not have a B3 terminal.	
⊖1, ⊖2	DC reactor terminals for power supply harmonic suppression	These terminals are used to connect a DC reactor for harmonic suppression.	
⊖	–	None. (Do not connect anything to this terminal.) Note: The following SERVOPACKs do not have a ⊖ terminal: SGD□S-330A to -550A.	

- Single-Phase, 200-VAC Power Supply Input

Terminal Symbols	Terminal Name	Specification	
L1, L2	Main circuit power input terminals for AC power input	Single-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz	
L1C, L2C	Control main circuit terminals	AC input	Single-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz
		DC input	L1C: 270 VDC to 324 VDC, -15% to +10%, L2C: 0 VDC or L2C: 270 VDC to 324 VDC, -15% to +10%, L1C: 0 VDC
B1/⊕, B2, B3	Regenerative resistor terminals	• SGD□S-R70A, -R90A, -1R6A, -2R8A If the regenerative capacity is insufficient, connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately. • SGD□S-5R5A, SGD7S-120A□□□008, SGDXS-120A□□□0008 If the internal regenerative resistor is insufficient, remove the lead or short bar between B2 and B3 and connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
⊖1, ⊖2	DC reactor terminals for power supply harmonic suppression	These terminals are used to connect a DC reactor for harmonic suppression.	
L3, ⊖	–	None. (Do not connect anything to these terminals.)	

A single-phase, 200-VAC power supply input can be used with the following SERVOPACK models.

- SGD□S-R70A, -R90A, -1R6A, -2R8A, -5R5A

3.2.2 I/O Signal Connector (CN1) Pin Layout

The pin layout for the I/O signal connector (CN1) of the Σ -7 series and Σ -X series are identical.

The above view is from the direction of the following arrow without the connector shell attached.

2	/SO1- (/BK-)	General-Purpose Sequence Output 1	1	/SO1+ (/BK+)	General-Purpose Sequence Output 1	15	BAT-	Battery for Absolute Encoder (-)	14	BAT+	Battery for Absolute Encoder (+)
4	ALM-	Servo Alarm Output	3	ALM+	Servo Alarm Output	17	PAO	Encoder Divided Pulse Output, Phase A	16	SG	Signal Ground
6	+24VIN	Sequence Input Signal Power Supply Input	5	TH	Overheat Protection Input	19	PBO	Encoder Divided Pulse Output, Phase B	18	/PAO	Encoder Divided Pulse Output, Phase A
8	/SI2 (N-OT)	General-Purpose Sequence Input 2	7	/SI1 (P-OT)	General-Purpose Sequence Input 1	21	PCO	Encoder Divided Pulse Output, Phase C	20	/PBO	Encoder Divided Pulse Output, Phase B
10	/SI4 (/Probe1)	General-Purpose Sequence Input 4	9	/SI3	General-Purpose Sequence Input 3	23	/SO2+	General-Purpose Sequence Output 2	22	/PCO	Encoder Divided Pulse Output, Phase C
12	/SI6 (/Home)	General-Purpose Sequence Input 6	11	/SI5 (/Probe2)	General-Purpose Sequence Input 5	25	/SO3+	General-Purpose Sequence Output 3	24	/SO2-	General-Purpose Sequence Output 2
			13	/SI0	General-Purpose Sequence Input 0				26	/SO3-	General-Purpose Sequence Output 3

3.3 SERVOPACK External Dimensions and Installation Dimensions

The external dimensions and installation dimensions of the Σ -7 series and Σ -X series differ for the following SERVOPACKs.

Single-phase, 200 VAC: SGD7S-120AA0A008 and SGDXS-120AA0A0008

The external dimensions and installation dimensions for SERVOPACKs other than the above are identical.

3.3.1 SGD□S-R70A, -R90A, -1R6A

Base-mounted SERVOPACKs

- SGD7S-R70A, -R90A, -1R6A

Approx. mass: 0.9 kg
Unit: mm

- SGDXS-R70A, -R90A, -1R6A

Approx. mass: 0.8 kg
Unit: mm

Rack-mounted SERVOPACKs

- SGD7S-R70A, -R90A, -1R6A

- SGDXS-R70A, -R90A, -1R6A

3.3.2 SGD□S-2R8A

Base-mounted SERVOPACKs

- SGD7S-2R8A

Approx. mass: 1.1 kg
Unit: mm

- SGDXS-2R8A

Approx. mass: 1.1 kg
Unit: mm

Rack-mounted SERVOPACKs

• SGD7S-2R8A

• SGDXS-2R8A

3.3.3 SGD□S-3R8A

Base-mounted SERVOPACKs

- SGD7S-3R8A

- SGDXS-3R8A

Rack-mounted SERVOPACKs

• SGD7S-3R8A

• SGDXS-3R8A

3.3.4 SGD□S-5R5A, -7R6A

Base-mounted SERVOPACKs

- SGD7S-5R5A, -7R6A

- SGDXS-5R5A, -7R6A

Rack-mounted SERVOPACKs

- SGD7S-5R5A, -7R6A

- SGDXS-5R5A, -7R6A

3.3.5 SGD□S-120A

Base-mounted SERVOPACKs

- SGD7S-120A

- SGDXS-120A

Rack-mounted SERVOPACKs

• SGD7S-120A

Approx. mass: 2.3 kg
Unit: mm

• SGDXS-120A

Approx. mass: 2.2 kg
Unit: mm

3.3.6 Single-phase, 200 VAC: SGD7S-120AA0A008, SGDXS-120AA0A0008

Base-mounted SERVOPACKs

- Single-phase, 200 VAC: SGD7S-120AA0A008

Note: The figures show the product with the terminal cover removed.

- Single-phase, 200 VAC: SGDXS-120AA0A0008

3.3.7 SGD□S-180A, -200A

Base-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

- SGD7S-180A, -200A

- SGDXS-180A, -200A

Rack-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

• SGD7S-180A, -200A

Approx. mass: 2.8 kg
Unit: mm

• SGDXS-180A, -200A

Approx. mass: 2.9 kg
Unit: mm

3.3.8 SGD□S-330A

Base-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

• SGD7S-330A

• SGDXS-330A

Rack-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

• SGD7S-330A

Approx. mass: 4.9 kg

Unit: mm

• SGDXS-330A

Approx. mass: 4.9 kg

Unit: mm

3.3.9 SGD□S-470A, -550A

Base-mounted SERVOPACKs

- SGD7S-470A, -550A

- SGDXS-470A, -550A

Duct-ventilated SERVOPACKs

• SGD7S-470A, -550A

[Hardware Option Code: 001]

• SGDXS-470A, -550A

[Hardware Option Code: 0001]

3.3.10 SGD□S-590A, -780A

Base-mounted SERVOPACKs

- SGD7S-590A, -780A

- SGDXS-590A, -780A

- SGD7S-590A, -780A

[Hardware Option Code: 001]

[Hardware Option Code: 001]

3.4 Mounting Hole Dimensions

The mounting hole dimensions for the Σ -7 series and Σ -X series are identical. (Excluding single phase, 200-VAC power supply compatible products (SGD7S-120AA0A008 and SGDXS-120AA0A0008).)

SERVOPACK Model	Dimensions (mm)								Screw Size	Number of Screws
	A	B	C	D	E	F	G	H		
SGD7S-120AA0A008	188	5	180±0.5	100	95	–	12.5	75±0.5	M4	3
SGDXS-120AA0A0008	168	5	160±0.5	90	5	80±0.5	12.5	–	M4	3

Specifications of Peripheral Devices

4

This chapter provides the specifications of peripheral devices.

4.1	Servomotor Main Circuit Cable	4-2
4.1.1	SGM7J, SGMXJ	4-2
4.1.2	SGM7A, SGMXA	4-4
4.1.3	SGM7P, SGMXP	4-11
4.1.4	SGM7G, SGMXG	4-13
4.2	Encoder Cable	4-20
4.2.1	SGM7J, SGMXJ	4-20
4.2.2	SGM7A, SGMXA	4-23
4.2.3	SGM7P, SGMXP	4-27
4.2.4	SGM7G, SGMXG	4-30
4.3	Cables for Connecting SERVOPACKs	4-33
4.3.1	I/O Signal Cables	4-33
4.3.2	EtherCAT Communications Cables	4-34
4.3.3	Other Cables	4-35
4.4	Digital Operator	4-36
4.5	Noise Filters	4-37
4.6	DC Reactors	4-38
4.7	Magnetic Contactors	4-39
4.8	Other Peripheral Devices	4-40

4.1 Servomotor Main Circuit Cable

4.1.1 SGM7J, SGMXJ

SGM7J-, SGMXJ-□□□□□□□□2 (Σ-7 compatible specifications)

Servomotor Model	Name	Cable Direction	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
SGM□J-A5 to -C2 (50 W to 150 W)	For servomotors without holding brakes	Load side	JZSP-C7M10F-□□-E	JZSP-C7M12F-□□-E	
		Non-load side	JZSP-C7M10G-□□-E	JZSP-C7M12G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M13F-□□-E	JZSP-C7M14F-□□-E	
		Non-load side	JZSP-C7M13G-□□-E	JZSP-C7M14G-□□-E	
SGM□J-02 to -06 (200 W to 600 W)	For servomotors without holding brakes	Load side	JZSP-C7M20F-□□-E	JZSP-C7M22F-□□-E	
		Non-load side	JZSP-C7M20G-□□-E	JZSP-C7M22G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M23F-□□-E	JZSP-C7M24F-□□-E	
		Non-load side	JZSP-C7M23G-□□-E	JZSP-C7M24G-□□-E	
SGM□J-08 (750 W)	For servomotors without holding brakes	Load side	JZSP-C7M30F-□□-E	JZSP-C7M32-□□-E	
		Non-load side	JZSP-C7M30G-□□-E	JZSP-C7M32G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M33F-□□-E	JZSP-C7M34F-□□-E	
		Non-load side	JZSP-C7M33G-□□-E	JZSP-C7M34G-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGMXJ-□□□□□□□□1 (standard specifications)

Servomotor Model	Name	Cable Direction	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
SGMXJ-A5 to -06 (50 W to 600 W)	For servomotors without holding brakes	Load side	JWSP-XMA5NS1-□□	JWSP-XMA5NF1-□□	
		Non-load side	JWSP-XMA5NS2-□□	JWSP-XMA5NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XMA5BS1-□□	JWSP-XMA5BF1-□□	
		Non-load side	JWSP-XMA5BS2-□□	JWSP-XMA5BF2-□□	
SGMXJ-08 (750 W)	For servomotors without holding brakes	Load side	JWSP-XM08NS1-□□	JWSP-XM08NF1-□□	
		Non-load side	JWSP-XM08NS2-□□	JWSP-XM08NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XM08BS1-□□	JWSP-XM08BF1-□□	
		Non-load side	JWSP-XM08BS2-□□	JWSP-XM08BF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

4.1.2 SGM7A, SGMXA

SGM7A-A5 to -10, SGMXA-A5□□□□□2 to -10□□□□□2 (Σ -7 compatible specifications)

Servomotor Model	Name	Cable Direction	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGM□A-A5 to -C2 (50 W to 150 W)	For servomotors without holding brakes	Load side	JZSP-C7M10F-□□-E	JZSP-C7M12F-□□-E	
		Non-load side	JZSP-C7M10G-□□-E	JZSP-C7M12G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M13F-□□-E	JZSP-C7M14F-□□-E	
		Non-load side	JZSP-C7M13G-□□-E	JZSP-C7M14G-□□-E	
SGM□A-02 to -06 (200 W to 600 W)	For servomotors without holding brakes	Load side	JZSP-C7M20F-□□-E	JZSP-C7M22F-□□-E

		Right-angle plug	JZSP-UVA632-□□-E	JZSP-UVA642-□□-E	
					

Continued on next page.

Continued from previous page.

Servomotor Model	Name	Connector Specifications	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGM7A-40, -50 (4.0 kW, 5.0 kW)	For servomotors without holding brakes	Straight plug	JZSP-UVA701-□□-E	JZSP-UVA721-□□-E	
		Right-angle plug	JZSP-UVA702-□□-E	JZSP-UVA722-□□-E	
	For servomotors with holding brakes (Set of two cables* ³)	Straight plug	JZSP-UVA731-□□-E	JZSP-UVA741-□□-E	
					
		Right-angle plug	JZSP-UVA732-□□-E	JZSP-UVA742-□□-E	
					
SGM7A-70 (7.0 kW)* ⁴	For servomotors without holding brakes	Straight plug	JZSP-UVA901-□□-E	JZSP-UVA921-□□-E	
		Right-angle plug	JZSP-UVA902-□□-E	JZSP-UVA922-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*3. This order number is for a set of two cables (main power supply cable and holding brake cable). When you purchase them separately, the order numbers for main power supply cables are the same as for a servomotor without a holding brake.

The following order numbers are for a holding brake cable. These standard cables are flexible cables.

- Straight plug: JZSP-U7B23-□□-E
- Right-angle plug: JZSP-U7B24-□□-E

*4. A cooling fan is built into the SGM7A-70 servomotor. There is no specified cable to connect to the built-in cooling fan connector. Use appropriate wiring materials for the built-in cooling fan connector specifications.

SGMXA-15 to -70 (Σ -7 compatible specifications, standard specifications)

Servomotor Model	Name	Connector Specification	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
SGMXA-15 (1.5 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM15NSS-□□	JWSP-XM15NFS-□□	
		Right-angle plug ^{*3}	JWSP-XM15NSL-□□	JWSP-XM15NFL-□□	
	For servomotors with holding brakes (Set of two cables ^{*4})	Straight plug	JWSP-XM15BSS-□□	JWSP-XM15BFS-□□	 
		Right-angle plug ^{*3}	JWSP-XM15BSL-□□	JWSP-XM15BFL-□□	 
	For servomotors without holding brakes	Straight plug	JWSP-XM20NSS-□□	JWSP-XM20NFS-□□	
		Right-angle plug ^{*3}	JWSP-XM20NSL-□□	JWSP-XM20NFL-□□

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*3. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

4.1 Servomotor Main Circuit Cable

4.1.2 SGM7A, SGMXA

- *4. This order number is for a set of two cables (main power supply cable and holding brake cable).
 When you purchase them separately, the order numbers for main power supply cables are the same as for a servomotor without a holding brake.
 The following order numbers are for a holding brake cable. These standard cables are flexible cables.
- Straight plug: JWSP-XB0FS-□□
 - Right-angle plug: JWSP-XB0FL-□□

Note: If you need a cable with a length of 20 m to 50 m, consider the operating conditions and specify a suitable length.

SGMXA-A5□□□□□□1 to -10□□□□□□1 (standard specifications)

Servomotor Model	Name	Cable Direction	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXA-A5 to -06 (50 W to 600 W)	For servomotors without holding brakes	Load side	JWSP-XMA5NS1-□□	JWSP-XMA5NF1-□□	
		Non-load side	JWSP-XMA5NS2-□□	JWSP-XMA5NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XMA5BS1-□□	JWSP-XMA5BF1-□□	
		Non-load side	JWSP-XMA5BS2-□□	JWSP-XMA5BF2-□□	
SGMXA-08 to -10 (750 W to 1.0 W)	For servomotors without holding brakes	Load side	JWSP-XM08NS1-□□	JWSP-XM08NF1-□□	
		Non-load side	JWSP-XM08NS2-□□	JWSP-XM08NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XM08BS1-□□	JWSP-XM08BF1-□□	
		Non-load side	JWSP-XM08BS2-□□	JWSP-XM08BF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

4.1.3 SGM7P, SGMXP

SGM7P-01 to -04

Servomotor Model	Name	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
SGM7P-01 (100 W)	For servomotors without holding brakes	JZSP-CSM01-□□-E	JZSP-CSM21-□□-E	
	For servomotors with holding brakes	JZSP-CSM11-□□-E	JZSP-CSM31-□□-E	
SGM7P-02, -04 (200 W, 400 W)	For servomotors without holding brakes	JZSP-CSM02-□□-E	JZSP-CSM22-□□-E	
	For servomotors with holding brakes	JZSP-CSM12-□□-E	JZSP-CSM32-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGM□P-08

Servomotor Model	Name	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
SGM□P-08 (750 W)	For servomotors without holding brakes	JZSP-CMM00-□□-E	JZSP-CMM01-□□-E	
	For servomotors with holding brakes	JZSP-CMM10-□□-E	JZSP-CMM11-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGM□P-15

Servomotor Model	Name	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
SGM□P-15 (1.5 kW)	For servomotors without holding brakes	JZSP-CMM20-□□-E	—	
	For servomotors with holding brakes	JZSP-CMM30-□□-E	—	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGMXP-01□□□□□□2 to -04□□□□□□2 (Σ -7 compatible specifications)

Servomotor Model	Name	Cable Direction	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXP-01 (100 W)	For servomotors without holding brakes	Load side	JZSP-C7M10F-□□-E	JZSP-C7M12F-□□-E	
		Non-load side	JZSP-C7M10G-□□-E	JZSP-C7M12G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M13F-□□-E	JZSP-C7M14F-□□-E	
		Non-load side	JZSP-C7M13G-□□-E	JZSP-C7M14G-□□-E	
SGMXP-02 to -04 (200 W to 400 W)	For servomotors without holding brakes	Load side	JZSP-C7M20F-□□-E	JZSP-C7M22F-□□-E	
		Non-load side	JZSP-C7M20G-□□-E	JZSP-C7M22G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M23F-□□-E	JZSP-C7M24F-□□-E	
		Non-load side	JZSP-C7M23G-□□-E	JZSP-C7M24G-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

Note: You can also use the cables for the SGM7P (JZSP-CSM□□-□□-E). The protective structure will be IP65 if you use the cables for the SGM7P.

SGMXP-01□□□□□□1 to -04□□□□□□1 (standard specifications)

Servomotor Model	Name	Cable Direction	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXP-01 to -04 (100 W to 400 W)	For servomotors without holding brakes	Load side	JWSP-XMA5NS1-□□	JWSP-XMA5NF1-□□	
		Non-load side	JWSP-XMA5NS2-□□	JWSP-XMA5NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XMA5BS1-□□	JWSP-XMA5BF1-□□	
		Non-load side	JWSP-XMA5BS2-□□	JWSP-XMA5BF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*3. This order number is for a set of two cables (main power supply cable and holding brake cable). When you purchase them separately, the order numbers for main power supply cables are the same as for a servomotor without a holding brake.

The following order numbers are for a holding brake cable. These standard cables are flexible cables.

- Straight plug: JWSP-XB0FS-□□
- Right-angle plug: JWSP-XB0FL-□□

Note: If you need a cable with a length of 20 m to 50 m, consider the operating conditions and specify a suitable length.

4.2 Encoder Cable

4.2.1 SGM7J, SGMXJ

Encoder Cable of 20 m or Less

◆ SGM7J-, SGMXJ-□□□□□□□□2 (Σ-7 compatible specifications)

Name	Cable Direction	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Load side	JZSP-C7PI0D-□□-E	JZSP-C7PI2D-□□-E	
	Non-load side	JZSP-C7PI0E-□□-E	JZSP-C7PI2E-□□-E	
For absolute encoder: With battery unit* ³	Load side	JZSP-C7PA0D-□□-E	JZSP-C7PA2D-□□-E	
	Non-load side	JZSP-C7PA0E-□□-E	JZSP-C7PA2E-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Relay Encoder Cables (Exceeding 20 m)

◆ SGM7J-, SGMXJ-□□□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-C7PRCD-E	
Relay encoder cable (for all types of encoders) Cable installed away from load	0.3	JZSP-C7PRCE-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*	0.3	JZSP-CSP12-E	

- * In the following cases, these cables are not required.
- When using a servomotor equipped with a batteryless absolute encoder.
 - When connecting a battery to the host controller.
 - When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXJ-□□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Load side	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	Non-load side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit* ³	Load side	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	Non-load side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

- *3. In the following cases, use an encoder cable for batteryless absolute encoders.
- When connecting a battery to the host controller.
 - When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXJ-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder Cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	SERVOPACK end Encoder end 
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	SERVOPACK end Encoder end Battery unit (battery included) 
Encoder Cable	Load side	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	SERVOPACK end Encoder end 
	Non-load side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

4.2.2 SGM7A, SGMXA

Encoder Cable of 20 m or Less

◆ SGM7A-A5 to -10, SGMXA-A5□□□□□□2 to -10□□□□□□2 (Σ-7 compatible specifications)

Name	Cable Direction	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Load side	JZSP-C7PI0D-□□-E	JZSP-C7PI2D-□□-E	
	Non-load side	JZSP-C7PI0E-□□-E	JZSP-C7PI2E-□□-E	
For absolute encoder: with battery unit* ³	Load side	JZSP-C7PA0D-□□-E	JZSP-C7PA2D-□□-E	
	Non-load side	JZSP-C7PA0E-□□-E	JZSP-C7PA2E-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGM7A-15 to -70

Name	Connector Specification	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Straight plug	JZSP-CVP01-□□-E	JZSP-CVP11-□□-E	
	Right-angle plug	JZSP-CVP02-□□-E	JZSP-CVP12-□□-E	
For absolute encoder: with battery unit* ³	Straight plug	JZSP-CVP06-□□-E	JZSP-CVP26-□□-E	
	Right-angle plug	JZSP-CVP07-□□-E	JZSP-CVP27-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXA-15□□□□□□2 to -70□□□□□□2 (Σ -7 compatible specifications)

Information SGMXA-15 to -70 Σ -7 compatible specification servomotors can also use the cables for the SGM7G servomotor.

Name	Connector Specification	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Straight plug	JWSP-XPISS-□□	JWSP-XPIFS-□□	
	Right-angle plug ^{*4, *5}	JWSP-XPISL-□□	JWSP-XPIFL-□□	
For absolute encoder: with battery unit ^{*3}	Straight plug	JWSP-XPASS-□□	JWSP-XPAFS-□□	
	Right-angle plug ^{*4, *5}	JWSP-XPASL-□□	JWSP-XPAFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*4. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*5. An encoder cable with a right-angle plug cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable with a straight plug.

Relay Encoder Cables (Exceeding 20 m)

◆ SGM7A-A5 to -10, SGMXA-A5□□□□□□2 to -10□□□□□□2 (Σ -7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-C7PRCD-E	
Relay encoder cable (for all types of encoders) Cable installed away from load	0.3	JZSP-C7PRCE-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*	0.3	JZSP-CSP12-E	

* In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGM7A-15 to -70, SGMXA-15□□□□□□2 to -70□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Straight plug	0.3	JZSP-CVP01-E	
Relay encoder cable (for all types of encoders) Right-angle plug*1, *2	0.3	JZSP-CVP02-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*3	0.3	JZSP-CSP12-E	

*1. The lead installation direction of the right-angle plug connector is the non-load side. Consult your Yaskawa representative for other lead installation directions.

*2. An encoder cable with a right-angle plug cannot be used for the SGM7A-70 (7.0 kW). Use an encoder cable with a straight plug.

*3. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXA-□□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number*1		Appearance
		Standard Cable	Flexible Cable*2	
For batteryless absolute encoders	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side*3	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit*4	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side*3	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. An encoder cable installed toward the left side cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable installed toward the right side.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXA-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder Cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	SERVOPACK end Encoder end 
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	SERVOPACK end Encoder end Battery unit (battery included) 
Encoder cable	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side ^{*5}	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	SERVOPACK end Encoder end 
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*5. An encoder cable installed toward the left side cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable installed toward the right side.

4.2.3 SGM7P, SGMXP

Encoder Cable of 20 m or Less

◆ SGM7P-01 to -04, SGMXP-01□□□□□□2 to -04□□□□□□2 (Σ-7 compatible specifications)

Name	Cable Direction	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Load side	JZSP-C7PI0D-□□-E	JZSP-C7PI2D-□□-E	
	Non-load side* ³	JZSP-C7PI0E-□□-E	JZSP-C7PI2E-□□-E	
For absolute encoder: with battery unit* ⁴	Load side	JZSP-C7PA0D-□□-E	JZSP-C7PA2D-□□-E	
	Non-load side* ³	JZSP-C7PA0E-□□-E	JZSP-C7PA2E-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20)

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. An encoder cable installed toward the non-load side cannot be used for the SGM7P.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGM7P-08, -15, SGMXP-08□□□□□□2, -15□□□□□□2 (Σ-7 compatible specifications)

Name	Order Number* ¹		Appearance
	Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders Cable installed toward load	JZSP-CMP00-□□-E	JZSP-CMP10-□□-E	
For absolute encoder: with battery unit* ³ Cable installed toward load	JZSP-CSP19-□□-E	JZSP-CSP29-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Relay Encoder Cables (Exceeding 20 m)

◆ SGM7P, SGMXP-□□□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-C7PRCD-E	
Relay encoder cable (for all types of encoders) Cable installed away from load*1	0.3	JZSP-C7PRCE-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*2	0.3	JZSP-CSP12-E	

*1. An encoder cable installed toward the non-load side cannot be used for the SGM7P.

*2. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXP-□□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number*1		Appearance
		Standard Cable	Flexible Cable*2	
For batteryless absolute encoders	Load side	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	Non-load side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit*3	Load side	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	Non-load side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXP-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	SERVOPACK end Encoder end 
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	SERVOPACK end Encoder end  Battery unit (battery included)
Encoder cable	Load side	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	SERVOPACK end Encoder end 
	Non-load side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

4.2.4 SGM7G, SGMXG

Encoder Cable of 20 m or Less

◆ SGM7G-

Name	Connector Specification	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Straight plug	JZSP-CVP01-□□-E	JZSP-CVP11-□□-E	
	Right-angle plug	JZSP-CVP02-□□-E	JZSP-CVP12-□□-E	
For absolute encoder: with battery unit ^{*3}	Straight plug	JZSP-CVP06-□□-E	JZSP-CVP26-□□-E	
	Right-angle plug	JZSP-CVP07-□□-E	JZSP-CVP27-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20)

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXG-□□□□□□□□2 (Σ-7 compatible specifications)

Information The SGMXG servomotor can use the cables for the SGM7G servomotor.

Name	Connector Specification	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Straight plug	JWSP-XPISS□□	JWSP-XPIFS-□□	
	Right-angle plug ^{*3}	JWSP-XPISL-□□	JWSP-XPIFL-□□	
For absolute encoder: with battery unit ^{*4}	Straight plug	JWSP-XPASS-□□	JWSP-XPAFS-□□	
	Right-angle plug ^{*3}	JWSP-XPASL-□□	JWSP-XPAFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Relay Encoder Cables (Exceeding 20 m)

◆ SGM7G-, SGMXG-□□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Straight plug	0.3	JZSP-CVP01-E	
Relay encoder cable (for all types of encoders) Right-angle plug*1		JZSP-CVP02-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*2	0.3	JZSP-CSP12-E	

*1. The lead installation direction of the right-angle plug connector is the non-load side. Consult your Yaskawa representative for other lead installation directions.

*2. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXG-□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number*1		Appearance
		Standard Cable	Flexible Cable*2	
For batteryless absolute encoders	Left side	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	Right side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit*3	Left side	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	Right side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXG-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	SERVOPACK end Encoder end 
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	SERVOPACK end Encoder end  Battery unit (battery included)
Encoder cable	Load side	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	SERVOPACK end Encoder end 
	Non-load side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

4.3 Cables for Connecting SERVOPACKs

4.3.1 I/O Signal Cables

Model	Name	Length (L)	Order Number	Appearance
SGD□S-	Connector kit (soldered)	–	JZSP-CSI9-1-E	
	Connector-terminal block converter unit (with cable)	0.5 m	JUSP-TA26P-E	
		1 m	JUSP-TA26P-1-E	
		2 m	JUSP-TA26P-2-E	
	Cable with loose wires at one end (loose wires on peripheral device end)	1 m	JZSP-CSI02-1-E	
		2 m	JZSP-CSI02-2-E	
		3 m	JZSP-CSI02-3-E	

4.3.2 EtherCAT Communications Cables

Σ-7 Series

Use Category 5e Ethernet communications cables to make the connections.

Use cables with the following specifications.

Shielded: S/STP or S/UTP

Length: 50 m max. (between nodes)

The following cable is recommended.

Manufacturer	Model
Beckhoff	ZB9020

Σ-X Series

Information You can also use the cables for the Σ-7 series.

Interface	Name		Length (L)	Order Number	Appearance
EtherCAT communications references	(without ferrite cores)	RJ-45 connectors on both ends	0.2 m	JZSP-CM3RRM0-00P2-E	
			0.5 m	JZSP-CM3RRM0-00P5-E	
			1 m	JZSP-CM3RRM0-01-E	
			2 m	JZSP-CM3RRM0-02-E	
			3 m	JZSP-CM3RRM0-03-E	
			4 m	JZSP-CM3RRM0-04-E	
			5 m	JZSP-CM3RRM0-05-E	
			10 m	JZSP-CM3RRM0-10-E	
			20 m	JZSP-CM3RR00-20-E	
			30 m	JZSP-CM3RR00-30-E	
	(with ferrite cores)	RJ-45 connectors on both ends	0.3 m	JZSP-CM3RRM1-00P3-E	
			3 m	JZSP-CM3RRM1-03-E	
			10 m	JZSP-CM3RRM1-10-E	
			20 m	JZSP-CM3RR01-20-E	
			30 m	JZSP-CM3RR01-30-E	
			50 m	JZSP-CM3RR01-50-E	

4.3.3 Other Cables

The specifications of the other cables for the Σ -7 series and Σ -X series are identical.

Name		Length (L)	Order Number	Appearance
Digital operator conversion cable		0.3 m	JZSP-CVS05-A3-E* ¹	
			JZSP-CVS07-A3-E* ²	
Computer cable		2.5 m	JZSP-CVS06-02-E	
Safety function device cable	Cables with connectors* ³	1 m	JZSP-CVH03-01-E	
		3 m	JZSP-CVH03-03-E	
	Connector kit* ⁴	—	Contact Tyco Electronics Japan G.K. Product name: Industrial Mini I/O D-shape Type 1 Plug Connector Kit Model number: 2013595-1	

*1. This converter cable is required to use the Σ -III-series digital operator (JUSP-OP05A).

*2. This converter cable is required to prevent the cable from disconnecting from the digital operator.

*3. When using safety functions, connect this cable to the safety function devices.
When not using safety functions, connect the enclosed safety jumper connector (JZSP-CVH05-E) to the SERVOPACK.

*4. Use the connector kit when you make cables yourself.

4.4 Digital Operator

Model	Order Number
SGD7S-	JUSP-OP05A-1-E
SGDXS-	JUSP-OP07A-E

4.5 Noise Filters

The specifications of the noise filters for the Σ -7 series and Σ -X series are identical.

Main Circuit Power Supply	SERVOPACK		Order Number
	Maximum Applicable Motor Capacity [kW]	Model: SGD□S-	
Single-phase, 200 VAC	0.05	R70A	HF2010A-UPF
	0.1	R90A	
	0.2	1R6A

	2.0	180A	SC-5-1
	3.0	200A	
	5.0	330A	SC-N1
	6.0	470A	
	7.5	550A	SC-N2
	11	590A	SC-N2S
	15	780A	SC-N3

4.8 Other Peripheral Devices

The specifications of the other peripheral devices for the Σ -7 series and Σ -X series are identical.

Name	Model	Input Voltage
Surge absorber	LT-C12G801WS	Single-phase, 200 VAC
	LT-C32G801WS	Three-phase, 200 VAC
Battery	JZSP-BA01 (ER6V C3N or equivalent)	—
Battery unit	JUSP-BA01-E	
Brake power supply (24-VDC power supply)	Not provided by Yaskawa	
CN8 jumper connector	JZSP-CVH05-E	

Making Settings for Replacement

5

This chapter provides the settings used for replacement.

5.1 Converting Parameters 5-2

- 5.1.1 Introduction 5-2
- 5.1.2 Exporting Parameters 5-2
- 5.1.3 Parameter Converter 5-2
- 5.1.4 Importing Parameters 5-3

5.2 Parameter Settings 5-4

- 5.2.1 Setting Parameters for Encoder Usage
Method 5-4
- 5.2.2 Setting Parameters for Encoder Resolution 5-4
- 5.2.3 Setting Parameters for Acceleration/Deceleration
Time 5-6

5.1 Converting Parameters

5.1.1 Introduction

The import/export function and the parameter converter function of SigmaWin+ can be used to enable use of the parameters from the Σ -7-series SERVOPACK in the Σ -X-series SERVOPACK. The procedure for parameter conversion is as follows.

Procedure	Description	Reference
1	Export the parameters of the Σ -7-series SERVOPACK.	5.1.2 <i>Exporting Parameters</i> on page 5-2
2	Convert the exported parameters.	5.1.3 <i>Parameter Converter</i> on page 5-2
3	Import the exported parameters to the Σ -X-series SERVOPACK.	5.1.4 <i>Importing Parameters</i> on page 5-3

Important

Use version 5.70 or later of SigmaWin+ to convert the parameters.

Information

To replace a single-axis SERVOPACK (model: SGD7S) with a Σ -X-series two-axis SERVOPACK (model: SGDXW), export the parameters for two axes each, convert each parameter for a Σ -X-series single-axis SERVOPACK (model: SGDXS), and then import each parameter into a Σ -X-series two-axis SERVOPACK as axes A and B.

5.1.2 Exporting Parameters

The operation procedure for exporting SERVOPACK parameters is as follows.

1. Use SigmaWin+ to establish an online connection to the SERVOPACK that contains the parameters to be exported (Σ -7-series SERVOPACK before replacement).
2. Click the [Menu] button in SigmaWin+ to open the Menu window, and click [Edit Parameters].

The Edit Parameters window will be displayed.

3. Click [Export] - [Usrs (SERVOPACK file)].

The Export window will be displayed.

4. Set the storage location of the data to be exported, set the file name, and click the [Save] button.

The export process will be started.

5. Check that the export data is saved to the specified location.

This completes the operation. Proceed to the next step.

5.1.3 Parameter Converter

The operation procedure for converting the exported SERVOPACK parameters is as follows.

1. Click the [Menu] button in SigmaWin+ to open the Menu window, and click [Parameter Converter].

The Parameter Converter window will be displayed.

2. Click the [Browse] button under [Conversion source Previous series], select the parameter data to be exported, and click the [OK] button.

The conversion source data will be displayed in the Parameter Converter window.

3. Click the [Save] button under [Conversion destination Σ -X series], specify the file name and file storage location, and click the [OK] button.

The conversion target file name will be displayed in the Parameter Converter window.

4. To save the conversion log, insert a check mark for [Save the log file (csv) at the same time].
5. Select the SERVOPACK model after replacement.
6. Enter information into the [Comments] box if necessary.
7. Click the [Convert] button.

The parameter conversion process will be started. Once the parameter conversion process is completed, the conversion results will be displayed in the Parameter Converter window.

8. Check the conversion results.
The points requiring special attention are highlighted. For details on the color-coded indicators, check the information at the top right of the window.
9. Click the [Complete] button.
10. Check that the converted results were saved to the specified location.
This completes the operation. Proceed to the next step.

5.1.4 Importing Parameters

The operation procedure for importing the converted parameters into the SERVOPACK after replacement is as follows.

1. Use SigmaWin+ to establish an online connection to the SERVOPACK after replacement (Σ -X-series SERVOPACK).
2. Click the [Menu] button in SigmaWin+ to open the Menu window, and click [Edit Parameters].

The Edit Parameters window will be displayed.

3. Correct the parameter setting values if necessary.
Refer to the following sections for details.
 5.1.3 Parameter Converter on page 5-2: Step 5
 5.2 Parameter Settings on page 5-4

4. Click [Import] - [Usrs (SERVOPACK file)].

The Import window will be displayed.

5. Set the storage location of the data to be imported, set the file name, and click the [Save] button.

The message dialog box will be displayed.

6. Check the information, and click the [Yes] button.

The parameter import process to the SERVOPACK will be started.
This completes the operation.

5.2 Parameter Settings

5.2.1 Setting Parameters for Encoder Usage Method

Absolute encoders only are available for the Σ -X-series servomotors.

And so, if you use a servomotor with an incremental encoder in the Σ -7 series and the following settings are used, 810h (Encoder Backup Alarm) will occur.

Pn002 (2002h) to n.□0□□ (Use the encoder according to encoder specifications.)

In this case, change to the following setting. (This is not changed by the parameter converter function.)

Pn002 (2002h) to n.□1□□ (Use the encoder as an incremental encoder.)

5.2.2 Setting Parameters for Encoder Resolution

Introduction

The encoder resolutions of the servomotors for the Σ -7/ Σ -X series are different.

- Σ -7 series: 20 bits, 24 bits
- Σ -X series: 26 bits

And so, when the old servomotor is replaced with a new one, the parameter settings for the electronic gear ratio or encoder bit count must be changed.

The parameters that are set vary depending on the usage method of the servomotor after replacement as shown below.

Usage Method of Servomotor After Replacement	Required Parameter Settings After Replacement	Reference
Use at encoder resolution of servomotor after replacement	Pn20E (220Eh) (Electronic Gear Ratio (Numerator)) Pn210 (2210h) (Electronic Gear Ratio (Denominator))	<i>Setting Pn20E (220Eh) and Pn210 (2210h) (Electronic Gear Ratio) on page 5-5</i>
Use at same encoder resolution as servomotor before replacement*	Pn21D (221Dh) (Encoder Resolution Setting)	<i>Setting Pn21D (221Dh) (Encoder Resolution Setting) on page 5-5</i>

* For Σ -7-series SERVOPACKs, also check the setting value of Pn040 (2040h) = n.□□X□ (encoder resolution compatibility selection). When Pn040 (2040h) = n.□□1□ is set, the resolution of the servomotor is recognized as 20 bits even though it is 24 bits.

Setting Pn20E (220Eh) and Pn210 (2210h) (Electronic Gear Ratio)

If the encoder resolution of the servomotor changes before and after replacement, Pn20E (220Eh) and Pn210 (2210h) (electronic gear ratio) must be set.

To use the same settings for the reference unit as before replacement, change the electronic gear ratio as shown below.

Encoder Resolution of Servomotor Before Replacement	Electronic Gear Ratio After Replacement Setting of (Pn20E (220Eh)/ Pn210 (2210h))	Electronic Gear Ratio After Replacement Setting example of (Pn20E (220Eh)/ Pn210 (2210h))*
20 bits	64 x Electronic gear ratio before replacement	Pn20E (220Eh) = 64, Pn210 (2210h) = 1
24 bits	4 x Electronic gear ratio before replacement	Pn20E (220Eh) = 4, Pn210 (2210h) = 1

* This is an example when the electronic gear ratio before replacement was set to 1:1 (Pn20E (220Eh) = 1, Pn210 (2210h) = 1).

If the reference unit is changed from the value before replacement, set the values calculated by the following formula for Pn20E (220Eh) and Pn210 (2210h). If the machine reduction gear ratio between the servomotor shaft and the load is given as n/m, where n is the number of load shaft rotations per m servomotor shaft rotations, the settings for the electronic gear ratio can be calculated as follows:

$$\text{Electronic gear ratio} \frac{B}{A} = \frac{\text{Pn20E (220Eh)}}{\text{Pn210 (2210h)}} = \frac{\text{Encoder resolution}}{\text{Travel distance per load shaft revolution (reference units)}} \times \frac{m}{n}$$

Important

Set the electronic gear ratio within the following range.

$0.001 \leq \text{Electronic gear ratio} \leq 64000$

If the electronic gear ratio is outside of this range, an 040h alarm (Parameter Setting Error) will occur.

Setting Pn21D (221Dh) (Encoder Resolution Setting)

To use the encoder resolution of the servomotor before replacement, Pn21D (221Dh) (encoder resolution setting) must be set.

First set Pn21D (221Dh) to n.□□□1 (enable encoder resolution compatibility), and then set the encoder resolution in Pn21D (221Dh) = n.□□□□.

Parameter		Description	When Enabled	Classification
Pn21D (221Dh)	n.□□□0 (default setting)	Disable encoder resolution compatibility.	After restart	Setup
	n.□□□1	Enable encoder resolution compatibility.		
Parameter		Description	When Enabled	Classification
Pn21D (221Dh)	n.□□4□	Operate as 20-bit encoder.	After restart	Setup
	n.□□6□	Operate as 22-bit encoder.		
	n.□□8□ (default setting)	Operate as 24-bit encoder.		
	n.□□A□	Operate as 26-bit encoder.		

Information

When Pn21D (221Dh) (encoder resolution setting) is set, Pn20E (220Eh) and Pn210 (2210h) (electronic gear ratio) do not need to be changed from the values set before replacement.

5.2.3 Setting Parameters for Acceleration/Deceleration Time

If the parameter setting value is used without changing it, the load ratio could increase.

The maximum speed of the servomotor is different between Σ -7-series servomotors and Σ -X-series servomotors.

The maximum speed of the Σ -7-series servomotor is 6000 min^{-1} , and the maximum speed of the Σ -X-series servomotor is 7000 min^{-1} .

The following parameters are related to the maximum servomotor speed.

Consequently, in order to have the same acceleration and deceleration slope as before replacement, the setting values of the parameters must be changed.

Pn305 (2305h) (Soft Start Acceleration Time)	The time required for the servomotor to accelerate from a stopped state to the maximum motor speed
Pn306 (2306h) (Soft Start Deceleration Time)	The time to decelerate the servomotor from the maximum motor speed
Pn30A (230Ah) (Deceleration Time for Servo OFF and Forced Stops)	The time to decelerate the servomotor from the maximum motor speed

Change the values by using the conversion formula below.

$$\text{Pn305 (2305h) } (\Sigma\text{-X value}) = \text{Pn305 (2305h) } (\Sigma\text{-7 value}) \times \frac{7}{6}$$

$$\text{Pn306 (2306h) } (\Sigma\text{-X value}) = \text{Pn306 (2306h) } (\Sigma\text{-7 value}) \times \frac{7}{6}$$

$$\text{Pn30A (230Ah) } (\Sigma\text{-X value}) = \text{Pn30A (230Ah) } (\Sigma\text{-7 value}) \times \frac{7}{6}$$

Operation Check After Replacement

6

This chapter describes the operation checks after replacement.

6.1 Flow of Operation Checks After Replacement . . 6-2

6.1 Flow of Operation Checks After Replacement

Step	Item	Description
1	Power ON	Turn on the power, and check that the SERVOPACK is powered on and that there are no problems with signal input from peripheral devices.
2	Test operation	Use the jog operation function to check the rotation direction of the motor without connecting the servomotor to the machine. Next, connect the servomotor to the machine, and issue an operation command from the host reference device to check the movement of the machine.
3	Gain adjustment	Perform gain adjustment as needed to optimize machine movement.
4	Full operation	In position control mode, perform the origin return operation if necessary.
5	Stopped	Quit the command, and stop operation. Also, check the conditions that lead to the servomotor coming to a stop.

Appendix

7.1 Checksheet for Replacing the Σ -7 series with the Σ -X series . . 7-2

7.1

Checksheet for Replacing the Σ -7 series with the Σ -X series

Classification	Item	Check Point	Check
Motor	Check of main unit mounting position	Check the mounting dimensions between the motor being used and the machine. Centering location diameter, mounting hole pitch, mounting hole diameter, shaft diameter, shaft shape (straight, key, center tap, taper), etc.	
	Check of specifications	Check that the motor currently being used is not a customer-specific type. If the motor is a special type, check the specifications in the delivery specifications.	
SERVOPACK (main unit)	Check of main unit mounting position	Check the dimensions (W, H, D) and mounting hole positions of the SERVOPACK that is being used.	
	Check of specifications	Check the delivery specifications of the SERVOPACK that is being used to make sure that it does not have NP, shapes, or processing (special treatment, etc.) specially designed for the customer.	
	Check of safety signal input	Check if the SERVOPACK that is being used is using the safety signal input.	
	Check of option specifications	Check if the SERVOPACK that is being used is using an option module. Reference options cannot be replaced.	
	Single-phase AC power supply input	- To use with a single-phase AC power supply input, connect the main circuit power supply cable to L1 and L2. - To use with a single-phase 200 V power supply input, change the parameter [Application Function Selections B] to enable support. (Pn00B.2 = 1)	
	DC power supply input	- Depending on the model, a protective fuse and an inrush current prevention circuit must be added between the DC power supply and the SERVOPACK. If this applies to your model, contact your Yaskawa representative. - To use with a DC power supply input, change the parameter [Application Function Selections 1] to enable support. (Pn001.0 = 1) Note: Connect the main circuit DC power supply after changing the parameters.	
SERVOPACK (software)	Check for any dedicated software	- Check whether the software of the SERVOPACK that is being used is standard software by checking the version number. If you are unsure whether the software is standard software, please contact Yaskawa and provide the version number that you found. - The software version can be checked using the product information readout function in the SigmaWin+ PC support software or the utility function Fn012 of the digital operator or the built-in panel operator.	
	Check of parameters	Check the parameters of the SERVOPACK that is being used. SigmaWin+ has a parameter converter function that converts parameters for the Σ -7 series to those for the Σ -X series. Because the Σ -X-series motor has an improved encoder resolution, the electronic gear ratio setting must be changed.	

Part 2: Σ -V Series $\rightarrow$ Σ -X Series

Introduction

1

This chapter describes the flow of operations for replacing a system that uses the Σ -V series with the Σ -X series and the eligible models for replacement.

1.1 Table of Servomotor and SERVOPACK Replacements ..1-2

1.2 Flow of Replacement Operations 1-4

1.1

Table of Servomotor and SERVOPACK Replacements

The following table shows the combinations of Σ -V-series servomotors and SERVOPACKs and their replacement combinations in the Σ -X series. Combinations that do not have any replacement in the Σ -X series are not listed.

To verify the detailed compatibility, refer to the following sections.

1.2 Flow of Replacement Operations

This document describes how to replace servomotors, SERVOPACKs, cables, and peripheral devices from the Σ -V series with those in the Σ -X series.

The operation flow for replacing the Σ -V series with the Σ -X series is as follows.

Step	Item	Description
1	Selecting the replacement model	 1.1 Table of Servomotor and SERVOPACK Replacements on page 1-2
2	Checking the system before replacement	To replace the servomotor and the SERVOPACK, check the following points. • How is the servomotor mounted in the machine • How is it wired (e.g., racks, pits, piping) • Information on devices in the control panel (e.g., check the capacity of circuit breakers, etc.) Refer to the following chapters for details on the check points.  7.1 Checksheet for Replacing the Σ-V series with the Σ-X series on page 7-2
3	Checking the specifications of the servomotor	 Chapter 2 Specifications of Servomotor
4	Checking the specifications of the SERVOPACK	 Chapter 3 Specifications of SERVOPACK
5	Checking the specifications of the peripheral devices	 Chapter 4 Specifications of Peripheral Devices
6	Making settings for replacement	 Chapter 5 Making Settings for Replacement
7	Replacing the peripheral devices	—
8	Replacing the servomotor	For details on the installation procedure for the servomotor, refer to the product manual for the replacement (new) servomotor.
9	Replacing the SERVOPACK	For details on the installation procedure for the SERVOPACK, refer to the product manual for the replacement (new) SERVOPACK.
10	Operation check after replacement	 Chapter 6 Operation Check After Replacement

*1. The rated output is 2.4 kW if you use the following combinations.

- SGMGV-30A servomotor and SGD-200A SERVOPACK
- SGMXG-30A servomotor and SGD-200A SERVOPACK

*2. In the Σ-X series, only SGMXG-03 to -20 servomotors are available with this shaft end.

*3. Only SGMXG-30 to -1E servomotors are available with this shaft end.

2.2

Comparison of Servomotor Characteristics

The following table compares the characteristics of the Σ -7-series servomotor and the Σ -X-series servomotor.

2.2.1

SGMJV and SGMXJ

Ratings

Servomotor Capacity	Model Σ -V: SGMJV- Σ -X: SGMXJ-	Rated Torque ^{*1,*2} (N·m)		Instantaneous Maximum Torque ^{*1} (N·m)		Rotor Moment of Inertia ($\times 10^{-4}$ kg·m ²)	
		Σ -V	Σ -X	Σ -V	Σ -X	Σ -V	Σ -X
50 W	A5	0.159		0.557		0.0414 (0.0561)	0.0421 (0.0501)
100 W	01	0.318		1.11		0.0665 (0.0812)	0.0669 (0.0749)
150 W	C2	0.477		1.67		0.0883 (0.103)	0.0946 (0.103)
200 W	02	0.637		2.23		0.259 (0.323)	0.263 (0.323)
400 W	04	1.27		4.46		0.442 (0.506)	0.486 (0.546)
600 W	06	1.91		6.69		0.667 (0.744)	0.800 (0.860)
750 W	08	2.39		8.36		1.57 (1.74)	1.59 (1.76)

*1. These items and the torque-rotation speed characteristics are based on operation in combination with a SER-VOPACK when the temperature of the armature winding is 100°C. The other items are values at 20°C.

*2. The rated torques are the continuous allowable torque values at an ambient temperature of 40°C with an aluminum heat sink having the following dimensions.

Capacity 50 W, 100 W: 200 mm $\times$ 200 mm $\times$ 6 mm

Capacity 150 W to 750 W: 250 mm $\times$ 250 mm $\times$ 6 mm

Note: The values in parentheses are for servomotors with holding brakes.

Torque - Rotation Speed Characteristics

Continued on next page.

Continued from previous page.

Note: 1. The characteristics in the intermittent duty zone depend on the power supply voltage.

The solid line shows the characteristics for three-phase 200 V and single-phase 230 V input, the dotted line shows the characteristics for single-phase 200 V input, and the dashed-dotted line shows the characteristics for single-phase 100 V input.

However, the SGMJV-A5A has the same characteristics for three-phase 200 V and single-phase 200 V.

- If the effective torque is within the allowable range for the rated torque, the servomotor can be used within the intermittent duty zone.
- If the length of the servomotor main circuit cable exceeds 20 m, the intermittent duty zone will become smaller because the voltage drop increases.

2.2.2 SGMV and SGMXA

Ratings

Model Σ-V: SGMV- Σ-X: SGMXA-	Servomotor Capacity	Rated Torque ^{*1,*2} (N·m)		Instantaneous Maximum Torque ^{*1} (N·m)		Rotor Moment of Inertia (×10 ⁻⁴ kg·m ²)	
		Σ-V	Σ-X	Σ-V	Σ-X	Σ-V	Σ-X
A5	50 W	0.159		0.477	0.557	0.0242 (0.0389)	0.0220 (0.0300)
01	100 W	0.318		0.955	1.11	0.0380 (0.0527)	0.0340 (0.0420)
C2	150 W	0.477		1.43	1.67	0.0531 (0.0678)	0.0461 (0.0541)
02	200 W	0.637		1.91	2.23	0.116 (0.180)	0.139 (0.199)
04	400 W	1.27		3.82	4.46	0.190 (0.254)	0.216 (0.276)
06	600 W	1.75	1.91 ^{*3}	5.25	6.69	0.326 (0.403)	0.315 (0.375)
08	750 W	2.39		7.16	8.36	0.769 (0.940)	0.773 (0.943)
10	1.0 kW	3.18		9.55	11.1	1.20 (1.41)	0.969 (1.14)

*1. These items and the torque-rotation speed characteristics are based on operation in combination with a SER-VOPACK when the temperature of the armature winding is 100°C. The other items are values at 20°C.

*2. The rated torques are the continuous allowable torque values at an ambient temperature of 40°C with an aluminum heat sink having the following dimensions.
Capacity 50 W, 100 W: 200 mm × 200 mm × 6 mm
Capacity 150 W to 400 W, 750 W: 250 mm × 250 mm × 6 mm
Capacity 600 W: Σ-V series is 250 mm × 250 mm × 6 mm, Σ-X series is 300 mm × 300 mm × 12 mm.
Capacity 1.5 kW: 300 mm × 300 mm × 12 mm

*3. If a heat sink of 250 mm × 250 mm × 6 mm is mounted, the rated output is 550 W and the rated torque is 1.75 N·m.

Note: The values in parentheses are for servomotors with holding brakes.

Connector Mounting Dimensions

◆ For Encoders

• Σ -V Series and Σ -X Series (Σ -7 compatible specifications)

The specifications of the connectors for the Σ -V series and Σ -X series (Σ -7 compatible specification) are identical.

1	PS	6*	BAT (+)
2	/PS	7	—
3	—	8	—
4	PS5V	9	PG0V
5	BAT (-)	10	FG (frame ground)

* A battery is required only for an absolute encoder.

< Σ -V series>

Receptacle: CM10-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

< Σ -X series>

Receptacle: CMV1-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug,
CMV1-AP10S-□-D for right-angle plug, CMV1-SP10S-□-D for straight plug,
CMV1S-AP10S-□-D for right-angle plug, CMV1S-SP10S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

• Σ -X Series (standard specifications)

The following figures show the installation direction of the encoder cable.

◆ For Servomotors

• Σ -V Series without Holding Brake and Σ -X Series

The specifications of the connectors for the Σ -V series and Σ -X series are identical.

A	Phase U	C	Phase W
B	Phase V	D	FG (frame ground)

<Manufacturers>

Japan Aviation Electronics Industry, Ltd.

• Σ -V Series with Holding Brakes

A	Phase U	E	Brake terminal
B	Phase V	F	Brake terminal
C	Phase W	G	—
D	FG (frame ground)		

<Manufacturers>

Japan Aviation Electronics Industry, Ltd.

◆ For Brakes

The specifications of the connectors for the Σ -V series and Σ -X series are identical.

1	Brake terminal
2	Brake terminal

Note: There is no voltage polarity for the brake terminals.

< Σ -V series>

Receptacle: CM10-R2P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP2S-□-D for right-angle plug, CM10-SP2S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

< Σ -X series>

Receptacle: CMV1-R2P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP2S-□-D for right-angle plug, CM10-SP2S-□-D for straight plug,
CMV1-AP2S-□-D for right-angle plug, CMV1-SP2S-□-D for straight plug,
CMV1S-AP2S-□-D for right-angle plug, CMV1S-SP2S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

- SGMSV

Unit: mm

Unit: mm

2-2-50

The following table shows external dimensions and installation dimensions of servomotors.

Note: 1. The dimensions are same for models with oil seals.

2. The values for a straight, without key specification are given.

Servo-motor Capacity	Model	L	LL	LM	LR	KB1	KB2*	KL1	(KL1)	Approx. Mass [kg]
7.0 kW	SGMSV-70A□A2□	397	334	291	63	201	261	114	—	18.5
	SGMXA-70A□A2□A□					224	259		157	

Servo-motor Capacity	Model	Flange Dimensions							Shaft End Dimensions	
		LA	LB	LC	LE	LG	LH	LZ	S	Q
7.0 kW	SGMSV-70A□A2□	145	110 ⁰ _{-0.035}	130	6	12	165	9	28 ⁰ _{-0.013}	55
	SGMXA-70A□A2□A□									

* For models that have a batteryless absolute encoder, KB2 is 8 mm greater than the given value. Refer to the following section for the values for individual models.

Servomotor Capacity	Model	KB2
7.0 kW	SGMXA-70AWA2□A□	

Cooling Fan Specifications

The cooling fan specifications for the Σ -V series and Σ -X series are identical.

- Single-phase, 220 V
- 50 Hz/60 Hz
- 17 W/15 W
- 0.11 A/0.09 A

Specifications of Fan Operation Error Detector

Only the Σ -V series features the fan operation error detector.

- Contact capacity maximum allowable voltage: 350 V (AC/DC)
Maximum allowable current: 120 mA (AC/DC)
Maximum controllable power: 360 mW
- Alarm contacts ON for normal fan rotation.
OFF at $1680 \pm 100 \text{ min}^{-1}$ max.
OFF for 3 seconds at startup.

Shaft End Specifications

The specifications of the shaft ends for the Σ -V series and Σ -X series are identical.

Connector Mounting Dimensions

◆ For Encoders

- Σ -V Series and Σ -X Series (Σ -7 compatible specifications)

The specifications of the connectors for the Σ -V series and Σ -X series (Σ -7 compatible specification) are identical.

1	PS	6*	BAT (+)
2	/PS	7	—
3	—	8	—
4	PS5V	9	PG0V
5	BAT (-)	10	FG (frame ground)

2.3 Servomotor External Dimensions and Installation Dimensions

2.3.9 SGMSV-70 and SGMXA-70

* A battery is required only for an absolute encoder.

< Σ -V series>

Receptacle: CM10-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug,
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

< Σ -X series>

Receptacle: CMV1-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug,
CMV1-AP10S-□-D for right-angle plug, CMV1-SP10S-□-D for straight plug,
CMV1S-AP10S-□-D for right-angle plug, CMV1S-SP10S-□-D for straight plug,
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

• Σ -X Series (standard specifications)

The following figures show the installation direction of the encoder cable.

◆ For Servomotors

The specifications of the connectors for the Σ -V series and Σ -X series are identical.

A	Phase U	C	Phase W
B	Phase V	D	FG (frame ground)

<Manufacturers>

Japan Aviation Electronics Industry, Ltd.

◆ For Fans

• Σ -V Series

A	Fan motor	D	Alarm pin
B	Fan motor	E	Alarm pin
C	—	F	FG (frame ground)

• Σ -X Series

A	Fan motor	D	—
B	Fan motor	E	—
C	—	F	FG (frame ground)

Receptacle: MS3102A14S-6P

Applicable plug: Not provided by Yaskawa.

Plug: MS3108B14S-6S

Cable Clamp: MS3057-6A

Manufacturer: Japan Aviation Electronics Industry, Ltd.

Note: 1. The servomotor connector (receptacle) is RoHS compliant.

Contact the connector manufacturer for RoHS-compliant cable-side connectors (not provided by Yaskawa).

2. Only the Σ -V series features the fan operation error detector.

For the Σ -X series, the D and E terminals are short-circuited on the servomotor.

When the fan is stopped, the servomotor is protected by the temperature sensor in the encoder.

2.3.10 SGMPS-01 to -04 and SGMXP-01 to -04

• SGMPS

• SGMXP-□□□□□□□2 (Σ-7 compatible specifications)

• SGMXP-□□□□□□□1 (standard specifications)

2.3 Servomotor External Dimensions and Installation Dimensions

2.3.10 SGMPS-01 to -04 and SGMXP-01 to -04

The following table shows external dimensions and installation dimensions of servomotors.

Note: 1. The values in parentheses are for servomotors with holding brakes.

2. The values for a straight, without key specification are given.

Servomotor Capacity	Model	L*	LL*	LM	Flange Dimensions							S	MD	ME	MW	MH	ML	Approx. Mass [kg]*
					LR	LE	LG	LC	LA	LB	LZ							
100 W	SGMPS-01A□A21-E	87 (115)	62 (90)	36	25		6	60	70	50 ⁰ _{-0.025}	5.5	8 ⁰ _{-0.009}	9	1	19.8	12	20	0.5 (0.7)

Connector Mounting Dimensions

◆ For Encoders

- Σ -V Series and Σ -X Series (Σ -7 compatible specifications)

The specifications of the connectors for the Σ -V series and Σ -X series are identical.

1	PS	6*	BAT (+)
2	/PS	7	—
3	—	8	—
4	PS5V	9	PG0V
5	BAT (-)	10	FG (frame ground)

* A battery is required only for an absolute encoder.

< Σ -V Series>

Receptacle: CM10-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug

(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

< Σ -X Series>

Receptacle: CMV1-R10P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP10S-□-D for right-angle plug, CM10-SP10S-□-D for straight plug,

CMV1-AP10S-□-D for right-angle plug, CMV1-SP10S-□-D for straight plug,

CMV1S-AP10S-□-D for right-angle plug, CMV1S-SP10S-□-D for straight plug

(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

- Σ -X Series (standard specifications)

The following figures show the installation direction of the encoder cable.

◆ For Servomotors

The specifications of the connectors for the Σ -V series and Σ -X series are identical.

A	Phase U	C	Phase W
B	Phase V	D	FG (frame ground)

<Manufacturers>

Σ -V series: DDK Ltd.

Σ -X series: Japan Aviation Electronics Industry, Ltd.

◆ For Brakes

The specifications of the connectors for the Σ -V series and Σ -X series are identical.

1	Brake terminal
2	Brake terminal

Note: There is no voltage polarity for the brake terminals.

< Σ -V series>

Receptacle: CM10-R2P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP2S-□-D for right-angle plug, CM10-SP2S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

< Σ -X series>

Receptacle: CMV1-R2P-D

Applicable plug: Not provided by Yaskawa.

Plug: CM10-AP2S-□-D for right-angle plug, CM10-SP2S-□-D for straight plug,
CMV1-AP2S-□-D for right-angle plug, CMV1-SP2S-□-D for straight plug,
CMV1S-AP2S-□-D for right angle plug, CMV1S-SP2S-□-D for straight plug
(□ depends on the applicable cable size.)

Manufacturer: DDK Ltd.

2.3.14 SGMGV-30 to -75 and SGMXG-30 to -75

- Without Holding Brakes
<SGMGV>

<SGMXG-□□□□□□1□2 (Σ-7 compatible specifications)>

<SGMXG-□□□□□□1□1 (standard specifications)>

* This is 0.04 for the SGMGV-55, -75, SGMXG-55, or -75.

• With Holding Brakes
<SGMGV>

<SGMXG-□□□□□□□C2 (Σ-7 compatible specifications)>

<SGMXG-□□□□□□□C1 (standard specifications)>

2-stage connector 1-stage connector

* This is 0.04 for the SGMGV-55, -75, SGMXG-55, or -75.

2.3 Servomotor External Dimensions and Installation Dimensions

2.3.14 SGMGV-30 to -75 and SGMXG-30 to -75

The following table shows external dimensions and installation dimensions of servomotors.

Note: 1. The values in parentheses are for servomotors with holding brakes.

2. The dimensions are same for models with oil seals.

3. The values for the shaft end of Σ -V series are for a straight shaft without key.

4. The values for the shaft end of Σ -X series are for a straight shaft without key and with tap.

Servo-motor Capacity	Model	L ^{*1}	LL ^{*1}	LM	LP ^{*1}	LR	KB1	KB2 ^{*1}	KB3	LW	KL1	(KL1) ^{*2}	KL3	(KL3) ^{*2}	MW	Approx. Mass [kg]

2.3.15 SGMGV-1A to -1E and SGMXG-1A to -1E

<SGMGV>

Technical drawing of the H series motor showing front, side, and shaft end views with dimensions and tolerances.

Front View (Left): Shows the motor's face with mounting feet. Dimensions include 11, 17, and 59 for the 2-stage connector, and 11, 17, and 59 for the 1-stage connector. A vertical dimension of 79 is also indicated.

Side View (Middle): Shows the motor's profile. Dimensions include LP, LL, LM, LR, LG, LE, LH dia., LB dia., S dia., and 4 x LZ dia. Tolerances are specified as $\pm 0.06A$ and $\phi 0.04 \text{ dia. } A$. A surface texture symbol $\sqrt{0.04}$ is shown.

Shaft End Details (Right): Shows the shaft with dimensions LR, LF, LA dia., LW, and S dia. A detail view of the shaft end shows dimensions ST dia., R1, Q, and S dia.

Unit: mm

The following table shows external dimensions and installation dimensions of servomotors.

Note: 1. The values in parentheses are for servomotors with holding brakes.

2. The dimensions are same for models with oil seals.

3. The values for a straight, without key specification are given.

Servo- motor Capacity	Model	L ^{*1}	LL ^{*1}	LM	LP ^{*1}	LR	KB1	KB2 ^{*1}	KB3	LW	KL1	(KL1) *2	KL3	(KL3) *2	Approx. Mass [kg]

			0.75 kW	5R5 ^{*1}
			1.0 kW	7R6
			1.5 kW	120 ^{*2}
			2.0 kW	180
			3.0 kW	200
			5.0 kW	330
			6.0 kW	470
			7.5 kW	550
			11 kW	590
			15 kW	780
(2)	Voltage	200 VAC	A	
		100 VAC	F	–
(3)	Interface ^{*3}	EtherCAT communications references	A0	
(4)	Design revision order	Standard	A	
			B ^{*4}	–

*1. These models can be used with either a single-phase or three-phase input.

*2. The models with a single-phase, 200-VAC power supply input (SGDV-120A□□A008, SGDXS-120A□□A0008) are available as a hardware option specification.

*3. The same SERVOPACKs are used for both rotary servomotors and linear servomotors.

*4. The models where the design revision order is B are as follows.

- SGDV-R70A, -R90A, -1R6A, 2R8A

3.2

SERVOPACK Connector Terminal Compatibility

The pin assignments for the terminal blocks of the Σ -V series and Σ -X series are identical.

3.2.1

Terminal Symbols and Terminal Names

Three-Phase, 200-VAC Power Supply Input

• SGD V-

Terminal Symbols	Terminal Name	Specification	
L1, L2, L3	Main circuit power input terminals for AC power input	Three-phase, 200 VAC to 230 VAC, -15% to +10%, 50 Hz/60 Hz	
L1C, L2C	Control main circuit terminals	AC input	Single-phase, 200 VAC to 230 VAC, -15% to +10%, 50 Hz/60 Hz
B1/⊕, B2	Regenerative resistor terminals	SGDV-R70A, -R90A, -1R6A, -2R8A If the regenerative capacity is insufficient, connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		SGDV-3R8A, -5R5A, -7R6A, -120A, -180A, -200A, -300A If the internal regenerative resistor is insufficient, remove the lead or short bar between B2 and B3 and connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		SGDV-470A, -550A Connect a regenerative resistor unit between B1/⊕ and B2. Obtain a regenerative resistor unit separately. These models do not have a B3 terminal.	
⊖1, ⊖2	DC reactor terminals for power supply harmonic suppression	These terminals are used to connect a DC reactor for harmonic suppression.	

• SGDXS-

Terminal Symbols	Terminal Name	Specification	
L1, L2, L3	Main circuit power input terminals for AC power input	Three-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz	
L1C, L2C	Control main circuit terminals	AC input	Single-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz
		DC input	L1C: 270 VDC to 324 VDC, -15% to +10%, L2C: 0 VDC or L2C: 270 VDC to 324 VDC, -15% to +10%, L1C: 0 VDC
B1/⊕, B2	Regenerative resistor terminals	SGDXS-R70A, -R90A, -1R6A, -2R8A If the regenerative capacity is insufficient, connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		SGDXS-3R8A, -5R5A, -7R6A, -120A, -180A, -200A, 300A If the internal regenerative resistor is insufficient, remove the lead or short bar between B2 and B3 and connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		SGDXS-470A, -550A Connect a regenerative resistor unit between B1/⊕ and B2. Obtain a regenerative resistor unit separately. These models do not have a B3 terminal.	
⊖1, ⊖2	DC reactor terminals for power supply harmonic suppression	These terminals are used to connect a DC reactor for harmonic suppression.	
⊖	–	None. (Do not connect anything to this terminal.) Note: The following SERVOPACKs do not have a ⊖ terminal: SGD?S-330A to -550A.	

Single-Phase, 200-VAC Power Supply Input

• SGDVS-

Terminal Symbols	Terminal Name	Specification	
L1, L2	Main circuit power input terminals for AC power input	Single-phase, 200 VAC to 230 VAC, -15% to +10%, 50 Hz/60 Hz	
L1C, L2C	Control main circuit terminals	AC input	Single-phase, 200 VAC to 230 VAC, -15% to +10%, 50 Hz/60 Hz
B1/⊕, B2, B3	Regenerative resistor terminals	SGDV-R70A, -R90A, -1R6A, -2R8A If the regenerative capacity is insufficient, connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
		SGDV-5R5A, -120A□□□008 If the internal regenerative resistor is insufficient, remove the lead or short bar between B2 and B3 and connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
⊖1, ⊖2	DC reactor terminals for power supply harmonic suppression	These terminals are used to connect a DC reactor for harmonic suppression.	

A single-phase, 200-VAC power supply input can be used with the following SERVOPACK models.

- SGDV-R70A, -R90A, -1R6A, -2R8A, -5R5A

• SGDXS-

Terminal Symbols	Terminal Name	Specification	
L1, L2	Main circuit power input terminals for AC power input	Single-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz	
L1C, L2C	Control main circuit terminals	AC input	Single-phase, 200 VAC to 240 VAC, -15% to +10%, 50 Hz/60 Hz
		DC input	L1C: 270 VDC to 324 VDC, -15% to +10%, L2C: 0 VDC or L2C: 270 VDC to 324 VDC, -15% to +10%, L1C: 0 VDC
B1/⊕, B2, B3	Regenerative resistor terminals	• SGDXS-R70A, -R90A, -1R6A, -2R8A If the regenerative capacity is insufficient, connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately. • SGDXS-5R5A, -120A□□□008 If the internal regenerative resistor is insufficient, remove the lead or short bar between B2 and B3 and connect an external regenerative resistor between B1/⊕ and B2. The external regenerative resistor is not included. Obtain it separately.	
⊖1, ⊖2	DC reactor terminals for power supply harmonic suppression	These terminals are used to connect a DC reactor for harmonic suppression.	
L3, ⊖	–	None. (Do not connect anything to these terminals.)	

A single-phase, 200-VAC power supply input can be used with the following SERVOPACK models.

- SGDXS-R70A, -R90A, -1R6A, -2R8A, -5R5A

3.2.2 I/O Signal Connector (CN1) Pin Layout

The above view is from the direction of the following arrow without the connector shell attached.

2	/SO1- (/BK-)	General-Purpose Sequence Output 1	1	/SO1+ (/BK+)	General-Purpose Sequence Output 1	15	BAT-	Battery for absolute encoder (-)	14	BAT+	Battery for Absolute Encoder (+)

3.3 SERVOPACK External Dimensions and Installation Dimensions

3.3.1 SGDVS-R70A, R90A, 1R6A and SGDXS-R70A, -R90A, -1R6A

Rack-mounted SERVOPACKs

- SGDVS-R70A, -R90A, -1R6A

- SGDXS-R70A, -R90A, -1R6A

3.3.2 SGDV-2R8A and SGDXS-2R8A

Base-mounted SERVOPACKs

• SGDV-2R8A

• SGDXS-2R8A

Rack-mounted SERVOPACKs

• SGDV-2R8A

• SGDXS-2R8A

Rack-mounted SERVOPACKs

• SGDVS-3R8A

• SGDXS-3R8A

3.3.4 SGDV-5R5A, -7R6A and SGDXS-3R8A, -7R6A

Base-mounted SERVOPACKs

- SGDV-5R5A, -7R6A

- SGDXS-5R5A, -7R6A

3.3.5 SGDVS-120A and SGDXS-120A

Base-mounted SERVOPACKs

• SGDVS-120A

• SGDXS-120A

Rack-mounted SERVOPACKs

• SGDVS-120A

• SGDXS-120A

3.3.6 Single-phase, 200 VAC: SGDVS-120AA0A008, SGDXS-120AA0A0008

Base-mounted SERVOPACKs

- Single-phase, 200 VAC: SGDVS-120AA0A008

Note: The figures show the product with the terminal cover removed.

- Single-phase, 200 VAC: SGDXS-120AA0A0008

3.3.7 SGDV-180A, -200A and SGDXS-180A, -200A

Base-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

- SGDV-180A, -200A

- SGDXS-180A, -200A

Rack-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

• SGDV-180A, -200A

• SGDXS-180A, -200A

3.3.8 SGDVS-330A and SGDXS-330A

Base-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

- SGDVS-330A

- SGDXS-330A

Rack-mounted SERVOPACKs

Note: The figures show the product with the terminal cover removed.

• SGDVS-330A

• SGDXS-330A

3.3.9 SGDV-470A, -550A and SGDXS-470A, -550A

Base-mounted SERVOPACKs

- SGDV-470A, -550A

Approx. mass: 10.2 kg
Unit: mm

- SGDXS-470A, -550A

Approx. mass: 9.0 kg
Unit: mm

Duct-ventilated SERVOPACK

- SGDV-470A, -550A

[Hardware Option Code: 001]

- SGDXS-470A, -550A

[Hardware Option Code: 0001]

3.3.10 SGDV-590A, -780A and SGDXS-590A, -780A

Base-mounted SERVOPACKs

- SGDV-590A, -780A

- SGDXS-590A, -780A

Duct-ventilated SERVOPACK

- SGDVS-590A, -780A
[Hardware Option Code: 001]

Approx. mass: 16.6 kg
Unit: mm

- SGDXS-590A, -780A
[Hardware Option Code: 001]

Approx. mass: 15 kg
Unit: mm

3.4 Mounting Hole Dimensions

If using a Σ -X-series SERVOPACK, you can also use the mounting holes that were used for the Σ -V-series SERVOPACK. (Excluding SGDXS-120AA0A0008.)

◆ Σ -X Series Mounting Hole Dimensions

SERVOPACK Model		Dimensions (mm)								Screw Size	Number of Screws
		A	B	C	D	E	F	G	H		
SGDXS-	R70A, R90A, 1R6A	168	5	160±0.5	40	35	–	25	–	M4	2
	2R8A	168	5	160±0.5	40	5	–	25	–	M4	2
	3R8A, 5R5A, 7R6A	168	5	160±0.5	70	6	58±0.5	64	–	M4	3
	120A, 120AA0A0008	168	5	160±0.5	90	5	80±0.5	12.5	–	M4	3
	180A, 200A	188	5	180±0.5	100	95	–	12.5	75±0.5	M4	3
	330A	258	6	250±0.5	110	5	100±0.5	13	84±0.5	M5	4
	470A, 550A	315	6	302.5±0.5	170	14	142±0.5	14	142±0.5	M6	4
	590A, 780A	390	7.5	375±0.5	260	30	200±0.5	30	200±0.5	M6	4

◆ Σ -V Series Compatible Mounting Hole Dimensions

SERVOPACK Model		Dimensions (mm)								Screw Size	Number of Screws
		A	B	C	D	E	F	G	H		
SGDV-	R70A, R90A, 1R6A	168	5	150±0.5	40	35	–	35	–	M4	2
	2R8A	168	5	150±0.5	40	5	–	35	–	M4	2
	3R8A, 5R5A, 7R6A	168	5	150±0.5	70	6	58±0.5	6	–	M4	3
	120A	168	5	150±0.5	90	5	80±0.5	5	–	M4	3

Specifications of Peripheral Devices

4

This chapter provides the specifications of peripheral devices.

4.1	Servomotor Main Circuit Cable	4-2
4.1.1	SGMJV, SGMXJ	4-2
4.1.2	SGMAV, SGMXA	4-5
4.1.3	SGMSV, SGMXA	4-10
4.1.4	SGMPS, SGMXP	4-13
4.1.5	SGMGV, SGMXG	4-15
4.2	Encoder Cable	4-19
4.2.1	SGMJV, SGMXJ	4-19
4.2.2	SGMAV, SGMXA	4-22
4.2.3	SGMSV, SGMXA	4-27
4.2.4	SGMPS, SGMXP	4-30
4.2.5	SGMGV, SGMXG	4-34
4.3	Cables for Connecting SERVOPACKs	4-37
4.3.1	I/O Signal Cables	4-37
4.3.2	EtherCAT Communications Cables	4-38
4.3.3	Other Cables	4-39
4.4	Digital Operator	4-40
4.5	Noise Filters	4-41
4.6	DC Reactors	4-42
4.7	Magnetic Contactors	4-43
4.8	Other Peripheral Devices	4-44

4.1 Servomotor Main Circuit Cable

4.1.1 SGMJV, SGMXJ

SGMJV

Servomotor Model	Name	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
SGMJV-A5 to -C2 (50 W to 150 W)	For servo-motors with-out holding brakes	JZSP-CSM01-□□-E	JZSP-CSM21-□□-E	
	For servo-motors with holding brakes	JZSP-CSM11-□□-E	JZSP-CSM31-□□-E	
SGMJV-02 to -06 (200 W to 600 W)	For servo-motors with-out holding brakes	JZSP-CSM02-□□-E	JZSP-CSM22-□□-E	
	For servo-motors with holding brakes	JZSP-CSM12-□□-E	JZSP-CSM32-□□-E	
SGMJV-08 (750 W)	For servo-motors with-out holding brakes	JZSP-CSM03-□□-E	JZSP-CSM23-□□-E	
	For servo-motors with holding brakes	JZSP-CSM13-□□-E	JZSP-CSM33-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGMXJ-□□□□□□□□2 (Σ-7 compatible specifications)

Servomotor Model	Name	Cable Direction	Order Number*1		Appearance
			Standard Cable	Flexible Cable*2	
SGMXJ-A5 to -C2 (50 W to 150 W)	For servomotors without holding brakes	Load side	JZSP-C7M10F-□□-E	JZSP-C7M12F-□□-E	
		Non-load side	JZSP-C7M10G-□□-E	JZSP-C7M12G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M13F-□□-E	JZSP-C7M14F-□□-E	
		Non-load side	JZSP-C7M13G-□□-E	JZSP-C7M14G-□□-E	
SGMXJ-02 to -06 (200 W to 600 W)	For servomotors without holding brakes	Load side	JZSP-C7M20F-□□-E	JZSP-C7M22F-□□-E	
		Non-load side	JZSP-C7M20G-□□-E	JZSP-C7M22G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M23F-□□-E	JZSP-C7M24F-□□-E	
		Non-load side	JZSP-C7M23G-□□-E	JZSP-C7M24G-□□-E	
SGMXJ-08 (750 W)	For servomotors without holding brakes	Load side	JZSP-C7M30F-□□-E	JZSP-C7M32-□□-E	
		Non-load side	JZSP-C7M30G-□□-E	JZSP-C7M32G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M33F-□□-E	JZSP-C7M34F-□□-E	
		Non-load side	JZSP-C7M33G-□□-E	JZSP-C7M34G-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGMXJ-□□□□□□□□1 (standard specifications)

Servomotor Model	Name	Cable Direction	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXJ-A5 to -06 (50 W to 600 W)	For servomotors without holding brakes	Load side	JWSP-XMA5NS1-□□	JWSP-XMA5NF1-□□	
		Non-load side	JWSP-XMA5NS2-□□	JWSP-XMA5NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XMA5BS1-□□	JWSP-XMA5BF1-□□	
		Non-load side	JWSP-XMA5BS2-□□	JWSP-XMA5BF2-□□	
SGMXJ-08 (750 W)	For servomotors without holding brakes	Load side	JWSP-XM08NS1-□□	JWSP-XM08NF1-□□	
		Non-load side	JWSP-XM08NS2-□□	JWSP-XM08NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XM08BS1-□□	JWSP-XM08BF1-□□	
		Non-load side	JWSP-XM08BS2-□□	JWSP-XM08BF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

4.1.2 SGMV, SGMXA

SGMV

Servomotor Model	Name	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
SGMV-A5 to -C2 (50 W to 150 W)	For servomotors without holding brakes	JZSP-CSM01-□□-E	JZSP-CSM21-□□-E	
	For servomotors with holding brakes	JZSP-CSM11-□□-E	JZSP-CSM31-□□-E	
SGMV-02 to -06 (200 W to 550 W)	For servomotors without holding brakes	JZSP-CSM02-□□-E	JZSP-CSM22-□□-E	
	For servomotors with holding brakes	JZSP-CSM12-□□-E	JZSP-CSM32-□□-E	
SGMV-08 to -10 (750 W to 1.0 kW)	For servomotors without holding brakes	JZSP-CSM03-□□-E	JZSP-CSM23-□□-E	
	For servomotors with holding brakes	JZSP-CSM13-□□-E	JZSP-CSM33-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGMXA-A5□□□□□2 to -10□□□□□2 (Σ -7 compatible specifications)

Servomotor Model	Name	Cable Direction	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXA-A5 to -C2 (50 W to 150 W)	For servomotors without holding brakes	Load side	JZSP-C7M10F-□□-E	JZSP-C7M12F-□□-E	
		Non-load side	JZSP-C7M10G-□□-E	JZSP-C7M12G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M13F-□□-E	JZSP-C7M14F-□□-E	
		Non-load side	JZSP-C7M13G-□□-E	JZSP-C7M14G-□□-E	
SGMXA-02 to -06 (200 W to 600 W)	For servomotors without holding brakes	Load side	JZSP-C7M20F-□□-E	JZSP-C7M22F-□□-E	
		Non-load side	JZSP-C7M20G-□□-E	JZSP-C7M22G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M23F-□□-E	JZSP-C7M24F-□□-E	
		Non-load side	JZSP-C7M23G-□□-E	JZSP-C7M24G-□□-E	
SGMXA-08 to -10 (750 W to 1.0 W)	For servomotors without holding brakes	Load side	JZSP-C7M30F-□□-E	JZSP-C7M32-□□-E	
		Non-load side	JZSP-C7M30G-□□-E	JZSP-C7M32G-□□-E	
	For servomotors with holding brakes	Load side	JZSP-C7M33F-□□-E	JZSP-C7M34F-□□-E	
		Non-load side	JZSP-C7M33G-□□-E	JZSP-C7M34G-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

SGMXA-15□□□□□□1 to -70□□□□□□1 (Σ-7 compatible specifications)

Servomotor Model	Name	Connector Specification	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXA-15 (1.5 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM15NSS-□□	JWSP-XM15NFS-□□	
		Right-angle plug* ³	JWSP-XM15NSL-□□	JWSP-XM15NFL-□□	
	For servomotors with holding brakes (Set of two cables* ⁴)	Straight plug	JWSP-XM15BSS-□□	JWSP-XM15BFS-□□	 
		Right-angle plug* ³	JWSP-XM15BSL-□□	JWSP-XM15BFL-□□	 
SGMXA-20, -25 (2.0 kW, 2.5 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM20NSS-□□	JWSP-XM20NFS-□□	
		Right-angle plug* ³	JWSP-XM20NSL-□□	JWSP-XM20NFL-□□	
	For servomotors with holding brakes (Set of two cables* ⁴)	Straight plug	JWSP-XM20BSS-□□	JWSP-XM20BFS-□□	 
		Right-angle plug* ³	JWSP-XM20BSL-□□	JWSP-XM20BFL-□□	 

Continued on next page.

4.1 Servomotor Main Circuit Cable

4.1.2 SGMV, SGMXA

Continued from previous page.

Servomotor Model	Name	Connector Specification	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXA-30 (3.0 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM30NSS-□□	JWSP-XM30NFS-□□	
		Right-angle plug* ³	JWSP-XM30NSL-□□	JWSP-XM30NFL-□□	
	For servomotors with holding brakes (Set of two cables* ⁴)	Straight plug	JWSP-XM30BSS-□□	JWSP-XM30BFS-□□	
		Right-angle plug* ³	JWSP-XM30BSL-□□	JWSP-XM30BFL-□□	
SGMXA-40, -50 (4.0 kW, 5.0 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM40NSS-□□	JWSP-XM40NFS-□□	
		Right-angle plug* ³	JWSP-XM40NSL-□□	JWSP-XM40NFL-□□	
	For servomotors with holding brakes (Set of two cables* ⁴)	Straight plug	JWSP-XM40BSS-□□	JWSP-XM40BFS-□□	
		Right-angle plug* ³	JWSP-XM40BSL-□□	JWSP-XM40BFL-□□	
SGMXA-70 (7.0 kW)	For servomotors without holding brakes	Straight plug	—	JWSP-XM70NFS-□□	
		Right-angle plug* ³	—	JWSP-XM70NFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20)

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*3. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*4. This order number is for a set of two cables (main power supply cable and holding brake cable).

When you purchase them separately, the order numbers for main power supply cables are the same as for a servomotor without a holding brake.

The following order numbers are for a holding brake cable. These standard cables are flexible cables.

- Straight plug: JWSP-XB0FS-□□
- Right-angle plug: JWSP-XB0FL-□□

Note: If you need a cable with a length of 20 m to 50 m, consider the operating conditions and specify a suitable length.

SGM4A-A5□□□□□□1 to -10□□□□□□1 (standard specifications)

Servomotor Model	Name	Cable Direction	Order Number*1		Appearance
			Standard Cable	Flexible Cable*2	
SGM4A-A5 to -06 (50 W to 600 W)	For servomotors without holding brakes	Load side	JWSP-XMA5NS1-□□	JWSP-XMA5NF1-□□	
		Non-load side	JWSP-XMA5NS2-□□	JWSP-XMA5NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XMA5BS1-□□	JWSP-XMA5BF1-□□	
		Non-load side	JWSP-XMA5BS2-□□	JWSP-XMA5BF2-□□	
SGM4A-08 to -10 (750 W to 1.0 W)	For servomotors without holding brakes	Load side	JWSP-XM08NS1-□□	JWSP-XM08NF1-□□	
		Non-load side	JWSP-XM08NS2-□□	JWSP-XM08NF2-□□	
	For servomotors with holding brakes	Load side	JWSP-XM08BS1-□□	JWSP-XM08BF1-□□	
		Non-load side	JWSP-XM08BS2-□□	JWSP-XM08BF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

4.1.3 SGMSV, SGMXA

SGMSV-

Cables with connectors between the SERVOPACK and SGMSV servomotors are not provided. The customer is responsible for fabricating these cables.

Use the connectors specified by Yaskawa for these servomotors. Note that the connector to be selected varies depending on the application environment of the motor. Two types are available.

- Normal environment type (standard)
- Type compliant with an IP67 protective structure and European Safety Standards
Yaskawa does not specify what wiring materials to use. Use the appropriate wiring materials for the connectors.

SGMXA-15 to -70 (Σ -7 compatible specifications, standard specifications)

Servomotor Model	Name	Connector Specification	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
SGMXA-15 (1.5 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM15NSS-□□	JWSP-XM15NFS-□□	
		Right-angle plug ^{*3}	JWSP-XM15NSL-□□	JWSP-XM15NFL-□□	
	For servomotors with holding brakes (Set of two cables ^{*4})	Straight plug	JWSP-XM15BSS-□□	JWSP-XM15BFS-□□

4.1 Servomotor Main Circuit Cable

4.1.3 SGMSV, SGMXA

Continued from previous page.

Servomotor Model	Name	Connector Specification	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
SGMXA-40, -50 (4.0 kW, 5.0 kW)	For servomotors without holding brakes	Straight plug	JWSP-XM40NSS-□□	JWSP-XM40NFS-□□	
		Right-angle plug* ³	JWSP-XM40NSL-□□	JWSP-XM40NFL-□□	
	For servomotors with holding brakes (Set of two cables* ⁴)	Straight plug	JWSP-XM40BSS-□□	JWSP-XM40BFS-□□	
		Right-angle plug* ³	JWSP-XM40BSL-□□	JWSP-XM40BFL-□□	
SGMXA-70 (7.0 kW)	For servomotors without holding brakes	Straight plug	—	JWSP-XM70NFS-□□	
	Right-angle plug* ³	Right-angle plug* ³	—	JWSP-XM70NFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*3. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*4. This order number is for a set of two cables (main power supply cable and holding brake cable).

When you purchase them separately, the order numbers for main power supply cables are the same as for a servomotor without a holding brake.

The following order numbers are for a holding brake cable. These standard cables are flexible cables.

- Straight plug: JWSP-XB0FS-□□
- Right-angle plug: JWSP-XB0FL-□□

Note: If you need a cable with a length of 20 m to 50 m, consider the operating conditions and specify a suitable length.

4.1.4 SGMPS, SGMXP

SGMPS

Servomotor Model	Name	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
SGMPS-01 (100 W)	For servomotors without holding brakes	JZSP-CSM01-□□-E	JZSP-CSM21-□□-E

		Non-load side	JWSP-XMA5BS2-□□	JWSP-XMA5BF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

4.1.5 SGMGV, SGMXG

SGMGV-

Cables with connectors between the SERVOPACK and SGMGV servomotors are not provided. The customer is responsible for fabricating these cables.

Use the connectors specified by Yaskawa for these servomotors. (These connectors are compliant with the standards.) Note that the connector to be selected varies depending on the application environment of the motor. Two types are available.

- Normal environment type (standard)
- Type compliant with an IP67 protective structure and European Safety Standards
Yaskawa does not specify what wiring materials to use. Use the appropriate wiring materials for the connectors.

SGMXG-03, -05

Servomotor Model	Name	Order Number* ¹ , * ²	Appearance
SGM?G-03, -05 (300 W, 450 W)	For servomotors without holding brakes	JZSP-CVM21-□□-E	
	For servomotors with holding brakes	JZSP-CVM41-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. These standard cables are flexible cables. The recommended bending radius (R) is 90 mm or larger.

SGMXG-09 to -1E

	For servomotors with holding brakes (Set of two cables* ³)	Straight plug	—	JWSP-XM1ABFS-□□	
					
		Right-angle plug	—	JWSP-XM1ABFL-□□	
					

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 90 mm or larger.

*3. This order number is for a set of two cables (main power supply cable and holding brake cable). When you purchase them separately, the order numbers for main power supply cables are the same as for a servomotor without a holding brake.

The following order numbers are for a holding brake cable. These standard cables are flexible cables.

- Straight plug: JWSP-XB0FS-□□
- Right-angle plug: JWSP-XB0FL-□□

Note: If you need a cable with a length of 20 m to 50 m, consider the operating conditions and specify a suitable length.

4.2 Encoder Cable

4.2.1 SGMJV, SGMXJ

Encoder Cable of 20 m or Less

◆ SGMJV-

Name	Type	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
Cable with connectors on both ends	Without battery unit (for incremental encoder)	JZSP-CSP01-□□-E	JZSP-CSP21-□□-E	
	With battery unit (for absolute encoder)	JZSP-CSP05-□□-E	JZSP-CSP25-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXJ-□□□□□□□□2 (Σ-7 compatible specifications)

Name	Cable Direction	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Load side	JZSP-C7PI0D-□□-E	JZSP-C7PI2D-□□-E	
	Non-load side	JZSP-C7PI0E-□□-E	JZSP-C7PI2E-□□-E	
For absolute encoder: with battery unit ^{*3}	Load side	JZSP-C7PA0D-□□-E	JZSP-C7PA2D-□□-E	
	Non-load side	JZSP-C7PA0E-□□-E	JZSP-C7PA2E-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Relay Encoder Cables (Exceeding 20 m)

◆ SGMJV-

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders)	0.3	JZSP-CSP11-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*	0.3	JZSP-CSP12-E	

* In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXJ-□□□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-C7PRCD-E	
Relay encoder cable (for all types of encoders) Cable installed away from load	0.3	JZSP-C7PRCE-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*	0.3	JZSP-CSP12-E	

* In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXJ-□□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Load side	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	Non-load side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit* ³	Load side	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	Non-load side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXJ-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
Encoder cable (with connectors on both ends)* ³	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	
	For absolute encoder: with battery unit* ⁴		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	
Encoder cable	Load side	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	
	Non-load side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

4.2.2 SGMV, SGMXA

Encoder Cable of 20 m or Less

◆ SGMV-

Name	Type	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
Cable with connectors on both ends	Without battery unit (for incremental encoder)	JZSP-CSP01-□□-E	JZSP-CSP21-□□-E	
	With battery unit (for absolute encoder) ^{*3}	JZSP-CSP05-□□-E	JZSP-CSP25-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXA-A5□□□□□□2 to -10□□□□□□2 (Σ-7 compatible specifications)

Name	Cable Direction	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Load side	JZSP-C7PI0D-□□-E	JZSP-C7PI2D-□□-E	
	Non-load side	JZSP-C7PI0E-□□-E	JZSP-C7PI2E-□□-E	
For absolute encoder: with battery unit ^{*3}	Load side	JZSP-C7PA0D-□□-E	JZSP-C7PA2D-□□-E	
	Non-load side	JZSP-C7PA0E-□□-E	JZSP-C7PA2E-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXA-15□□□□□□2 to -70□□□□□□2 (Σ-7 compatible specifications)

Information SGMXA-15 to -70 Σ-7 compatible specification servomotors can also use the cables for the SGM7G servomotor.

Name	Connector Specification	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Straight plug	JWSP-XPISS-□□	JWSP-XPIFS-□□	
	Right-angle plug* ⁴ , * ⁵	JWSP-XPISL-□□	JWSP-XPIFL-□□	
For absolute encoder: with battery unit* ³	Straight plug	JWSP-XPASS-□□	JWSP-XPAFS-□□	
	Right-angle plug* ⁴ , * ⁵	JWSP-XPASL-□□	JWSP-XPAFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*4. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*5. An encoder cable with a right-angle plug cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable with a straight plug.

Relay Encoder Cables (Exceeding 20 m)

◆ SGMV-

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders)	0.3	JZSP-CSP11-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*	0.3	JZSP-CSP12-E	

* In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGM4A-A5□□□□□□2 to -10□□□□□□2 (Σ -7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-C7PRCD-E	
Relay encoder cable (for all types of encoders) Cable installed away from load	0.3	JZSP-C7PRCE-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*	0.3	JZSP-CSP12-E	

* In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGM4A-15□□□□□□2 to -70□□□□□□2 (Σ -7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Straight plug	0.3	JZSP-CVP01-E	
Relay encoder cable (for all types of encoders) Right-angle plug *1, *2	0.3	JZSP-CVP02-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*3	0.3	JZSP-CSP12-E	

*1. The lead installation direction of the right-angle plug connector is the non-load side. Consult your Yaskawa representative for other lead installation directions.

*2. An encoder cable with a right-angle plug cannot be used for the SGM4A-70 (7.0 kW). Use an encoder cable with a straight plug.

*3. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

For batteryless absolute encoders	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side ^{*3}	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit ^{*4}	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side ^{*3}	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. An encoder cable installed toward the left side cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable installed toward the right side.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGM4A-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	
Encoder cable	SGM4A-A5 to -10: load side SGM4A-15 to -50: left side ^{*5}	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	
	SGM4A-A5 to -10: non-load side SGM4A-15 to -50: right side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*5. An encoder cable installed toward the left side cannot be used for the SGM4A-70 (7.0 kW). Use an encoder cable installed toward the right side.

4.2.3 SGMSV, SGMXA

Encoder Cable of 20 m or Less

◆ SGMSV-

Name	Connector Specification	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
Without battery unit	Straight plug	JZSP-CVP01-□□-E	JZSP-CVP11-□□-E	
	Right-angle plug ^{*4}	JZSP-CVP02-□□-E	JZSP-CVP12-□□-E	
With battery unit ^{*3}	Straight plug	JZSP-CVP06-□□-E	JZSP-CVP26-□□-E	
	Right-angle plug ^{*4}	JZSP-CVP07-□□-E	JZSP-CVP27-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*4. An encoder cable with a right-angle plug cannot be used for the SGMSV-70A (7.0 kW). Use an encoder cable with a straight plug.

◆ SGMXA-15□□□□□□2 to -70□□□□□□2 (Σ-7 compatible specifications)

Information SGMXA-15 to -70 Σ-7 compatible specification servomotors can also use the cables for the SGM7G servomotor.

Name	Connector Specification	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Straight plug	JWSP-XPISS-□□	JWSP-XPIFS-□□	
	Right-angle plug ^{*4, *5}	JWSP-XPISL-□□	JWSP-XPIFL-□□	
For absolute encoder: with battery unit ^{*3}	Straight plug	JWSP-XPASS-□□	JWSP-XPAFS-□□	
	Right-angle plug ^{*4, *5}	JWSP-XPASL-□□	JWSP-XPAFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*4. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*5. An encoder cable with a right-angle plug cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable with a straight plug.

Relay Encoder Cables (Exceeding 20 m)

◆ SGMSV-15 to -70, SGMXA-15□□□□□□2 to -70□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Straight plug	0.3	JZSP-CVP01-E	
Relay encoder cable (for all types of encoders) Right-angle plug*1, *2	0.3	JZSP-CVP02-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*3	0.3	JZSP-CSP12-E	

*1. The lead installation direction of the right-angle plug connector is the non-load side. Consult your Yaskawa representative for other lead installation directions.

*2. An encoder cable with a right-angle plug cannot be used for the SGMSV-70 and SGMXA-70 (7.0 kW). Use an encoder cable with a straight plug.

*3. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXA-□□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number*1		Appearance
		Standard Cable	Flexible Cable*2	
For batteryless absolute encoders	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side*3	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit*4	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side*3	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. An encoder cable installed toward the left side cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable installed toward the right side.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXA-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number* ¹		Appearance
			Standard Cable	Flexible Cable* ²	
Encoder cable (with connectors on both ends)* ³	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	SERVOPACK end Encoder end 
	For absolute encoder: with battery unit* ⁴		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	SERVOPACK end Encoder end  Battery unit (battery included)
Encoder cable	SGMXA-A5 to -10: load side SGMXA-15 to -50: left side* ⁵	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	SERVOPACK end Encoder end 
	SGMXA-A5 to -10: non-load side SGMXA-15 to -50: right side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

*5. An encoder cable installed toward the left side cannot be used for the SGMXA-70 (7.0 kW). Use an encoder cable installed toward the right side.

4.2.4 SGMPS, SGMXP

Encoder Cable of 20 m or Less

◆ SGMPS-01 to -04

Name	Type	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
Cable with connectors on both ends	Without battery unit (for incremental encoder)	JZSP-CSP01-□□-E	JZSP-CSP21-□□-E	
	With battery unit (for absolute encoder) ^{*3}	JZSP-CSP05-□□-E	JZSP-CSP25-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMPS-08, -15, SGMXP-08□□□□□□2, -15□□□□□□2 (Σ-7 compatible specifications)

Name	Order Number ^{*1}		Appearance
	Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders (for incremental encoders) Cable installed toward load	JZSP-CMP00-□□-E	JZSP-CMP10-□□-E	
For absolute encoder: with battery unit ^{*3} Cable installed toward load	JZSP-CSP19-□□-E	JZSP-CSP29-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXP-01□□□□□□2 to -04□□□□□□2 (Σ-7 compatible specifications)

Name	Cable Direction	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Load side	JZSP-C7PI0D-□□-E	JZSP-C7PI2D-□□-E	
	Non-load side	JZSP-C7PI0E-□□-E	JZSP-C7PI2E-□□-E	
For absolute encoder: with battery unit* ³	Load side	JZSP-C7PA0D-□□-E	JZSP-C7PA2D-□□-E	
	Non-load side	JZSP-C7PA0E-□□-E	JZSP-C7PA2E-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Relay Encoder Cables (Exceeding 20 m)

◆ SGMPS

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-CSP11-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*2	0.3	JZSP-CSP12-E	

*1. An encoder cable installed toward the non-load side cannot be used for the SGMPS.

*2. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXP-□□□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Cable installed toward load	0.3	JZSP-C7PRCD-E	
Relay encoder cable (for all types of encoders) Cable installed away from load*1	0.3	JZSP-C7PRCE-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*2	0.3	JZSP-CSP12-E	

*1. An encoder cable installed toward the non-load side cannot be used for the SGM7P.

*2. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXP-□□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number ^{*1}		Appearance
		Standard Cable	Flexible Cable ^{*2}	
For batteryless absolute encoders	Load side	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	Non-load side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit ^{*3}	Load side	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	Non-load side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXP-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	
Encoder cable	Load side	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	
	Non-load side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

4.2.5 SGMGV, SGMXG

Encoder Cable of 20 m or Less

◆ SGMGV-

Name	Connector Specification	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
Without battery unit	Straight plug	JZSP-CVP01-□□-E	JZSP-CVP11-□□-E	
	Right-angle plug	JZSP-CVP02-□□-E	JZSP-CVP12-□□-E	
With battery unit* ³	Straight plug	JZSP-CVP06-□□-E	JZSP-CVP26-□□-E	
	Right-angle plug	JZSP-CVP07-□□-E	JZSP-CVP27-□□-E	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

◆ SGMXG-□□□□□□□□2 (Σ-7 compatible specifications)

Information

The SGMXG servomotor can use the cables for the SGM7G servomotor.

Name	Connector Specification	Order Number* ¹		Appearance
		Standard Cable	Flexible Cable* ²	
For batteryless absolute encoders	Straight plug	JWSP-XPISS-□□	JWSP-XPIFS-□□	
	Right-angle plug* ³	JWSP-XPISL-□□	JWSP-XPIFL-□□	
For absolute encoder: with battery unit* ⁴	Straight plug	JWSP-XPASS-□□	JWSP-XPAFS-□□	
	Right-angle plug* ³	JWSP-XPASL-□□	JWSP-XPAFL-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The lead installation direction is away from the load. Consult your Yaskawa representative for other lead installation directions.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Relay Encoder Cables (Exceeding 20 m)

◆ SGMGV-, SGMXG-□□□□□□□2 (Σ-7 compatible specifications)

Name	Length (L) [m]	Order Number	Appearance
Relay encoder cable (for all types of encoders) Straight plug	0.3	JZSP-CVP01-E	
Relay encoder cable (for all types of encoders) Right-angle plug*1		JZSP-CVP02-E	
Relay encoder cable with connectors on both ends (for all types of encoders)	30	JZSP-UCMP00-30-E	
	40	JZSP-UCMP00-40-E	
	50	JZSP-UCMP00-50-E	
Relay encoder cable with connectors on both ends and battery unit*2	0.3	JZSP-CSP12-E	

*1. The lead installation direction of the right-angle plug connector is the non-load side. Consult your Yaskawa representative for other lead installation directions.

*2. In the following cases, these cables are not required.

- When using a servomotor equipped with a batteryless absolute encoder.
- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Encoder Cables (When Not Relaying the Encoder Cable)

◆ SGMXG-□□□□□□□1 (standard specifications)

Name	Cable Direction	Order Number*1		Appearance
		Standard Cable	Flexible Cable*2	
For batteryless absolute encoders	Left side	JWSP-XP2IS1-□□	JWSP-XP2IF1-□□	
	Right side	JWSP-XP2IS2-□□	JWSP-XP2IF2-□□	
For absolute encoder: with battery unit*3	Left side	JWSP-XP2AS1-□□	JWSP-XP2AF1-□□	
	Right side	JWSP-XP2AS2-□□	JWSP-XP2AF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (03/05/10/15/20/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

Note: Do not use these cables as relay cables.

Encoder Cables (When Relaying the Encoder Cable)

◆ SGMXG-□□□□□□□□1 (standard specifications)

When you will relay the encoder cable, use the following configuration.

Cables: 2 cables, cable relay point: 1 location, combined cable length: 50 m

Name	Type or Cable Direction	Length (L) [m]	Order Number ^{*1}		Appearance
			Standard Cable	Flexible Cable ^{*2}	
Encoder cable (with connectors on both ends) ^{*3}	For batteryless absolute encoders	0.3, 3, 5, 10, 15, 20, 25	JWSP-XP1IS0-□□	JWSP-XP1IF0-□□	SERVOPACK end Encoder end 
	For absolute encoder: with battery unit ^{*4}		JWSP-XP1AS0-□□	JWSP-XP1AF0-□□	SERVOPACK end Encoder end  Battery unit (battery included)
Encoder cable	Load side	0.3, 1, 3, 5, 10, 15, 20, 25, 30, 40, 50	JWSP-XP3IS1-□□	JWSP-XP3IF1-□□	SERVOPACK end Encoder end 
	Non-load side		JWSP-XP3IS2-□□	JWSP-XP3IF2-□□	

*1. Replace the boxes (□□) in the order number with the cable length (00P3/01/03/05/10/15/20/25/30/40/50).

*2. Use flexible cables for moving parts of machines, such as robots. The recommended bending radius (R) is 46 mm or larger.

*3. The JZSP-UCMP00-□□-E and JZSP-CSP12-E cables cannot be connected.

*4. In the following cases, use an encoder cable for batteryless absolute encoders.

- When connecting a battery to the host controller.
- When using an absolute encoder as an incremental encoder.

4.3 Cables for Connecting SERVOPACKs

4.3.1 I/O Signal Cables

Model	Name	Length (L)	Order Number	Appearance
SGDV- SGDXS-	Connector kit (soldered)	–	JZSP-CSI9-2-E	
	Connector-terminal block converter unit (with cable)	0.5 m	JUSP-TA26P-E	
		1 m	JUSP-TA26P-1-E	
		2 m	JUSP-TA26P-2-E	
	Cable with loose wires at one end (loose wires on peripheral device end)	1 m	JZSP-CSI02-1-E	
		2 m	JZSP-CSI02-2-E	
		3 m	JZSP-CSI02-3-E	

4.3.2 EtherCAT Communications Cables

Σ-V Series

Use Category 5e Ethernet communications cables to make the connections.

Use cables with the following specifications.

Shielded: S/STP or S/UTP

Length: 50 m max. (between nodes)

The following cable is recommended.

Manufacturer	Model
Beckhoff	ZB9020

Σ-X Series

Information You can also use the cables for the Σ-V series.

Interface	Name		Length (L)	Order Number	Appearance
EtherCAT communications references	(without ferrite cores)	RJ-45 connectors on both ends	0.2 m	JZSP-CM3RRM0-00P2-E	
			0.5 m	JZSP-CM3RRM0-00P5-E	
			1 m	JZSP-CM3RRM0-01-E	
			2 m	JZSP-CM3RRM0-02-E	
			3 m	JZSP-CM3RRM0-03-E	
			4 m	JZSP-CM3RRM0-04-E	
			5 m	JZSP-CM3RRM0-05-E	
			10 m	JZSP-CM3RRM0-10-E	
			20 m	JZSP-CM3RR00-20-E	
			30 m	JZSP-CM3RR00-30-E	
	(with ferrite cores)	RJ-45 connectors on both ends	0.3 m	JZSP-CM3RRM1-00P3-E	
			3 m	JZSP-CM3RRM1-03-E	
			10 m	JZSP-CM3RRM1-10-E	
			20 m	JZSP-CM3RR01-20-E	
			30 m	JZSP-CM3RR01-30-E	
			50 m	JZSP-CM3RR01-50-E	

4.3.3 Other Cables

The specifications of the other cables for the Σ -V series and Σ -X series are identical.

Name		Length (L)	Order Number	Appearance
Digital operator conversion cable		0.3 m	JZSP-CVS05-A3-E* ¹	
			JZSP-CVS07-A3-E* ²	
Computer cable		2.5 m	JZSP-CVS06-02-E	
Safety function device cable	Cables with connectors* ³	1 m	JZSP-CVH03-01-E	
		3 m	JZSP-CVH03-03-E	
	Connector kit* ⁴	—	Contact Tyco Electronics Japan G.K. Product name: Industrial Mini I/O D-shape Type 1 Plug Connector Kit Model number: 2013595-1	

*1. This converter cable is required to use the Σ -III-series digital operator (JUSP-OP05A).

*2. This converter cable is required to prevent the cable from disconnecting from the digital operator.

*3. When using safety functions, connect this cable to the safety function devices.

When not using safety functions, connect the enclosed safety jumper connector (JZSP-CVH05-E) to the SERVOPACK.

*4. Use the connector kit when you make cables yourself.

	6.0	470A		
	7.5	550A	SC-N2	
	11	590A	SC-N2S	
	15	780A	SC-N3	

4.8 Other Peripheral Devices

The specifications of the encoder cables and other peripheral devices for the Σ -V series and Σ -X series are identical.

Name	Model	Input Voltage
Surge absorber	LT-C12G801WS	Single-phase, 200 VAC
	LT-C32G801WS	Three-phase, 200 VAC
Battery	JZSP-BA01 (ER6V C3N or equivalent)	—
Battery unit	JUSP-BA01-E	
Brake power supply (24-VDC power supply)	Not provided by Yaskawa	
CN8 jumper connector	JZSP-CVH05-E	

Making Settings for Replacement

5

This chapter provides the settings used for replacement.

5.1 Converting Parameters 5-2

- 5.1.1 Introduction 5-2
- 5.1.2 Exporting Parameters 5-2
- 5.1.3 Parameter Converter 5-2
- 5.1.4 Importing Parameters 5-3

5.2 Parameter Settings 5-4

- 5.2.1 Setting Parameters for Encoder Usage
Method 5-4
- 5.2.2 Setting Parameters for Encoder Resolution 5-4
- 5.2.3 Setting Parameters for Acceleration/Deceleration
Time 5-6

5.1 Converting Parameters

5.1.1 Introduction

The import/export function and the parameter converter function of SigmaWin+ can be used to enable use of the parameters from the Σ -V-series SERVOPACK in the Σ -X-series SERVOPACK. The procedure for parameter conversion is as follows.

Procedure	Description	Reference
1	Export the parameters of the Σ -V-series SERVOPACK.	5.1.2 <i>Exporting Parameters</i> on page 5-2
2	Convert the exported parameters.	5.1.3 <i>Parameter Converter</i> on page 5-2
3	Import the exported parameters to the Σ -X-series SERVOPACK.	5.1.4 <i>Importing Parameters</i> on page 5-3

Use version 5.70 or later of SigmaWin+ to convert the parameters.

5.1.2 Exporting Parameters

The operation procedure for exporting SERVOPACK parameters is as follows.

1. Use SigmaWin+ to establish an online connection to the SERVOPACK that contains the parameters to be exported (Σ -V-series SERVOPACK before replacement).
2. Click the [Menu] button in SigmaWin+ to open the Menu window, and click [Edit Parameters].

The Edit Parameters window will be displayed.

3. Click [Export] - [Usrs (SERVOPACK file)].

The Export window will be displayed.

4. Set the storage location of the data to be exported, set the file name, and click the [Save] button.

The export process will be started.

5. Check that the export data is saved to the specified location.

This completes the operation. Proceed to the next step.

5.1.3 Parameter Converter

To convert the parameters of the Σ -V series, they must be converted to parameters of the Σ -7 series and then to parameters of the Σ -X series.

The operation procedure for converting the exported SERVOPACK parameters is as follows.

1. Click the [Menu] button in SigmaWin+ to open the Menu window, and click [Parameter Converter].

The Parameter Converter window will be displayed.

2. Click the [Browse] button under [Conversion source Previous series], select the parameter data to be exported, and click the [OK] button.

The conversion source data will be displayed in the Parameter Converter window.

3. Click the [Save] button for the conversion destination, specify the file name and file storage location, and click the [OK] button.

The conversion target file name will be displayed in the Parameter Converter window.

4. To save the conversion log, insert a check mark for [Save the log file (csv) at the same time].

5. Select the SERVOPACK model after replacement.

6. Enter information into the [Comments] box if necessary.

7. Click the [Convert] button.

The parameter conversion process will be started. Once the parameter conversion process is completed, the conversion results will be displayed in the Parameter Converter window.

8. Check the conversion results.

The points requiring special attention are highlighted. For details on the color-coded indicators, check the information at the top right of the window.

9. Click the [Complete] button.

10. Check that the converted results were saved to the specified location.

This completes the conversion of the parameters to the Σ -7 series.

Use the same procedure to convert to the parameters of the Σ -X series.

This completes the operation. Proceed to the next step.

5.1.4 Importing Parameters

The operation procedure for importing the converted parameters into the SERVOPACK after replacement is as follows.

1. Use SigmaWin+ to establish an online connection to the SERVOPACK after replacement (Σ -X-series SERVOPACK).
2. Click the [Menu] button in SigmaWin+ to open the Menu window, and click [Edit Parameters].

The Edit Parameters window will be displayed.

3. Correct the parameter setting values if necessary.

Refer to the following sections for details.

 5.1.3 Parameter Converter on page 5-2: Step 8

 5.2 Parameter Settings on page 5-4

4. Click [Import] - [Usrs (SERVOPACK file)].

The Import window will be displayed.

5. Set the storage location of the data to be imported, set the file name, and click the [Save] button.

The message dialog box will be displayed.

6. Check the information, and click the [Yes] button.

The parameter import process to the SERVOPACK will be started.

This completes the operation.

5.2 Parameter Settings

5.2.1 Setting Parameters for Encoder Usage Method

Absolute encoders only are available for the Σ -X-series servomotors.

And so, if you use a servomotor with an incremental encoder in the Σ -V series and the following settings are used, 810h (Encoder Backup Alarm) will occur.

Pn002 (2002h) to n.□0□□ (Use the encoder according to encoder specifications.)

In this case, change to the following setting. (This is not changed by the parameter converter function.)

Pn002 (2002h) to n.□1□□ (Use the encoder as an incremental encoder.)

5.2.2 Setting Parameters for Encoder Resolution

Introduction

The encoder resolutions of the servomotors for the Σ -V/ Σ -X series are different.

- Σ -V series: 13 bits, 17 bits, 20 bits
- Σ -X series: 26 bits

And so, when the old servomotor is replaced with a new one, the parameter settings for the electronic gear ratio or encoder bit count must be changed.

The parameters that are set vary depending on the usage method of the servomotor after replacement as shown below.

Usage Method of Servomotor After Replacement	Required Parameter Settings After Replacement	Reference
Use at encoder resolution of servomotor after replacement	Pn20E (220Eh) (Electronic Gear Ratio (Numerator)) Pn210 (2210h) (Electronic Gear Ratio (Denominator))	<i>Setting Pn20E (220Eh) and Pn210 (2210h) (Electronic Gear Ratio) on page 5-5</i>
Use at same encoder resolution as servomotor before replacement	Pn21D (221Dh) (Encoder Resolution Setting)	<i>Setting Pn21D (221Dh) (Encoder Resolution Setting) on page 5-5</i>

Setting Pn20E (220Eh) and Pn210 (2210h) (Electronic Gear Ratio)

If the encoder resolution of the servomotor changes before and after replacement, Pn20E (220Eh) and Pn210 (2210h) (electronic gear ratio) must be set.

To use the same settings for the reference unit as before replacement, change the electronic gear ratio as shown below.

Encoder Resolution of Servomotor Before Replacement	Electronic Gear Ratio After Replacement Setting of (Pn20E (220Eh)/ Pn210 (2210h))	Electronic Gear Ratio After Replacement Setting example of (Pn20E (220Eh)/ Pn210 (2210h))*
13 bits	8192 x Electronic gear ratio before replacement	Pn20E (220Eh) = 8192, Pn210 (2210h) = 1
17 bits	512 x Electronic gear ratio before replacement	Pn20E (220Eh) = 512, Pn210 (2210h) = 1
20 bits	64 x Electronic gear ratio before replacement	Pn20E (220Eh) = 64, Pn210 (2210h) = 1

* This is an example when the electronic gear ratio before replacement was set to 1:1 (Pn20E (220Eh) = 1, Pn210 (2210h) = 1).

If the reference unit is changed from the value before replacement, set the values calculated by the following formula for Pn20E (220Eh) and Pn210 (2210h). If the machine reduction gear ratio between the servomotor shaft and the load is given as n/m, where n is the number of load shaft rotations per m servomotor shaft rotations, the settings for the electronic gear ratio can be calculated as follows:

$$\text{Electronic gear ratio} \frac{B}{A} = \frac{\text{Pn20E (220Eh)}}{\text{Pn210 (2210h)}} = \frac{\text{Encoder resolution}}{\text{Travel distance per load shaft revolution (reference units)}} \times \frac{m}{n}$$

Set the electronic gear ratio within the following range.

0.001 ≤ Electronic gear ratio ≤ 64000

If the electronic gear ratio is outside of this range, an 040h alarm (Parameter Setting Error) will occur.

Setting Pn21D (221Dh) (Encoder Resolution Setting)

To use the encoder resolution of the servomotor before replacement, Pn21D (221Dh) (encoder resolution setting) must be set.

First set Pn21D (221Dh) to n.□□□1 (enable encoder resolution compatibility), and then set the encoder resolution in Pn21D (221Dh) = n.□□□□.

Parameter		Description	When Enabled	Classification
Pn21D (221Dh)	n.□□□0 (default setting)	Disable encoder resolution compatibility.	After restart	Setup
	n.□□□1	Enable encoder resolution compatibility.		
Parameter		Description	When Enabled	Classification
Pn21D (221Dh)	n.□□4□	Operate as 20-bit encoder.	After restart	Setup
	n.□□6□	Operate as 22-bit encoder.		
	n.□□8□ (default setting)	Operate as 24-bit encoder.		
	n.□□A□	Operate as 26-bit encoder.		

Information When Pn21D (221Dh) (encoder resolution setting) is set, Pn20E (220Eh) and Pn210 (2210h) (electronic gear ratio) do not need to be changed from the values set before replacement.

5.2.3 Setting Parameters for Acceleration/Deceleration Time

If the parameter setting value is used without changing it, the load ratio could increase.

The maximum speed of the servomotor is different between Σ -V-series servomotors and Σ -X-series servomotors.

The maximum speed of the Σ -V-series servomotor is 6000 min^{-1} , and the maximum speed of the Σ -X-series servomotor is 7000 min^{-1} .

The following parameters are related to the maximum servomotor speed.

Consequently, in order to have the same acceleration and deceleration slope as before replacement, the setting values of the parameters must be changed.

Pn305 (2305h) (Soft Start Acceleration Time)	The time required for the servomotor to accelerate from a stopped state to the maximum motor speed
Pn306 (2306h) (Soft Start Deceleration Time)	The time to decelerate the servomotor from the maximum motor speed
Pn30A (230Ah) (Deceleration Time for Servo OFF and Forced Stops)	The time to decelerate the servomotor from the maximum motor speed

Change the values by using the conversion formula below.

$$\text{Pn305 (2305h) } (\Sigma\text{-X value}) = \text{Pn305 (2305h) } (\Sigma\text{-V value}) \times \frac{7}{6}$$

$$\text{Pn306 (2306h) } (\Sigma\text{-X value}) = \text{Pn306 (2306h) } (\Sigma\text{-V value}) \times \frac{7}{6}$$

$$\text{Pn30A (230Ah) } (\Sigma\text{-X value}) = \text{Pn30A (230Ah) } (\Sigma\text{-V value}) \times \frac{7}{6}$$

Operation Check After Replacement

6

This chapter describes the operation checks after replacement.

6.1 Flow of Operation Checks After Replacement . . 6-2

6.1 Flow of Operation Checks After Replacement

Step	Item	Description
1	Power ON	Turn on the power, and check that the SERVOPACK is powered on and that there are no problems with signal input from peripheral devices.
2	Test operation	Use the jog operation function to check the rotation direction of the motor without connecting the servomotor to the machine. Next, connect the servomotor to the machine, and issue an operation command from the host reference device to check the movement of the machine.
3	Gain adjustment	Perform gain adjustment as needed to optimize machine movement.
4	Full operation	In position control mode, perform the origin return operation if necessary.
5	Stopped	Quit the command, and stop operation. Also, check the conditions that lead to the servomotor coming to a stop.

Appendix

7

7.1 Checksheet for Replacing the Σ -V series with the Σ -X series . . 7-2

7.1 Checksheet for Replacing the Σ -V series with the Σ -X series

Classification	Item	Check Point	Check
Motor	Check of main unit mounting position	Check the mounting dimensions between the motor being used and the machine. Centering location diameter, mounting hole pitch, mounting hole diameter, shaft diameter, shaft shape (straight, key, center tap, taper), etc.	
	Check of specifications	Check that the motor currently being used is not a customer-specific type. If the motor is a special type, check the specifications in the delivery specifications.	
SERVOPACK (main unit)	Check of main unit mounting position	Check the dimensions (W, H, D) and mounting hole positions of the SERVOPACK that is being used.	
	Check of specifications	Check the delivery specifications of the SERVOPACK that is being used to make sure that it does not have NP, shapes, or processing (special treatment, etc.) specially designed for the customer.	
	Check of safety signal input	Check if the SERVOPACK that is being used is using the safety signal input.	
	Check of option specifications	Check if the SERVOPACK that is being used is using an option module. Reference options cannot be replaced.	
	Single-phase AC power supply input	- To use with a single-phase AC power supply input, connect the main circuit power supply cable to L1 and L2. - To use with a single-phase 200 V power supply input, change the parameter [Application Function Selections B] to enable support. (Pn00B.2 = 1)	
	DC power supply input	- Depending on the model, a protective fuse and an inrush current prevention circuit must be added between the DC power supply and the SERVOPACK. If this applies to your model, contact your Yaskawa representative. - To use with a DC power supply input, change the parameter [Application Function Selections 1] to enable support. (Pn001.0 = 1) Note: Connect the main circuit DC power supply after changing the parameters.	
SERVOPACK (software)	Check for any dedicated software	- Check whether the software of the SERVOPACK that is being used is standard software by checking the version number. If you are unsure whether the software is standard software, please contact Yaskawa and provide the version number that you found. - The software version can be checked using the product information readout function in the SigmaWin+ PC support software or the utility function Fn012 of the digital operator or the built-in panel operator.	
	Check of parameters	Check the parameters of the SERVOPACK that is being used. SigmaWin+ has a parameter converter function that converts parameters for the Σ -V series to those for the Σ -X series. Because the Σ -X-series motor has an improved encoder resolution, the electronic gear ratio setting must be changed.
