

Below is a list of HMI manufacturers that are known to support the Memobus protocol, and have been tested at Yaskawa. The list has been broken up in two HMI product varieties:

1. "AN" (Alpha-Numeric) types include function keys and 2x20 or 4x40 displays
2. "G" (Graphical) types include function keys or touch screens which are typically 5" to 14" in size.

Copy and paste the website address(s) below to access HMI Manufacturer Information.
