

Title: What is the procedure to reset an MPiec controller back to factory defaults?

Product(s): MP2300iec, MP2600iec, MP3200iec, MP3300iec, Sigma7-Siec, MotionWorks IEC

Doc. No. CNT-77E5S3

There are two ways to reset an MPiec controller to factory defaults, one using a web browser and the other with MotionWorks IEC's Hardware Configuration.

Web Browser Method

Over the course of time, the MPiec controllers have included two web interfaces. Starting with firmware version 3.2, the web interface shown in this document was added. Controllers with firmware older than 3.2 supported the original web interface for Windows Internet Explorer, and also contained the ability to reset the controller to factory defaults. Connect to the MPiec controller using a web browser and enter the username and password. The default username is "Admin", the default password is the Software Platform (listed on the MPiec home page) minus the "iec". For example, for the MP3300iec shown below, the Software Platform is "MP3300iec" so the default password is MP3300. This applies to all MPiec controllers except the MP2310iec for which the password is the same as for the MP2300Siec, "MP2300S".

To complete the restoration to factory defaults, reboot the controller.

Click on Reboot at the top of the screen and then click Reboot again in the confirmation screen.

Title: What is the procedure to reset an MPiec controller back to factory defaults?

Product(s): MP2300iec, MP2600iec, MP3200iec, MP3300iec, Sigma7-Siec, MotionWorks IEC

Using MotionWorks IEC Hardware Configuration

To reset an MPiec Controller to factory defaults using Hardware Configuration, open MotionWorks IEC, open the project, or start a new project, and click on the Hardware Configuration icon.

Click the Online menu and select "Controller Configuration Utilities."

Select "Restore controller to factory defaults and reboot the controller."

Controller Configuration Utilities				
Send offline configuration to controller then reboot controller				
Restore controller to factory defaults then reboot controller				
Create archive of current project on controller				
Send project archive to controller then reboot controller				
Send CAM data file to data/cam directory on the controller				
<u>Execute</u> Close				

Tip: If the Restore controller to factory defaults and reboot the controller is greyed out, then there no Startup configuration saved on the MPiec controller. In this situation, use the web browser method, or save a configuration onto the MPiec controller first.

Click "OK" on the warning dialog

FAQ

Title: What is the procedure to reset an MPiec controller back to factory defaults?

Product(s): MP2300iec, MP2600iec, MP3200iec, MP3300iec, Sigma7-Siec, MotionWorks IEC

Doc. No. CNT-77E5S3

Click "Yes" on the reboot dialog.

Restoring a controller to factory defaults means that all application flies are deleted from flash memory. The firmware is not affected, nor the battery backed SRAM, which may contain absolute encoder offsets. To clear the SRAM, use the Init SRAM function in the web interface.
