

Title: Can MotionWorks IEC Project Archives be created Offline?

Product(s): MP2300Siec, MP2310iec, MP2600iec, MP3200iec, MP3300iec, MotionWorks IEC

Doc. No. MTN-9CGKC6

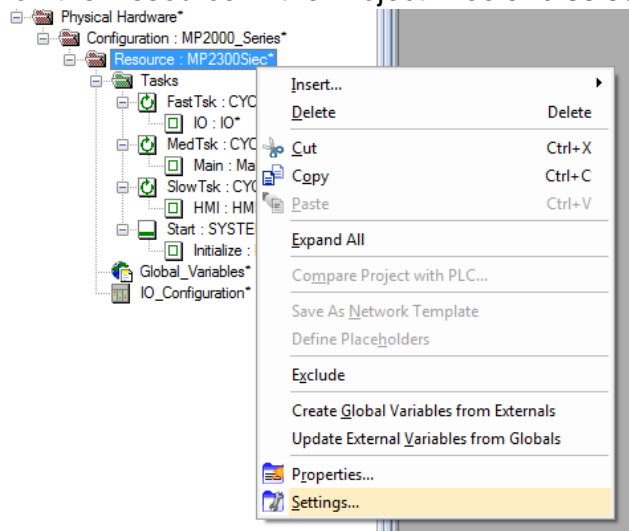

Yes. MotionWorks IEC development software revision 2.5.0 and higher can create Project Archives while offline.

The offline Project Archive feature is very useful when a machine has been put into production and small changes to the IEC application program are required. By sending a Project Archive file to the machine user, maintenance technicians can load the updated program into the controller using the MPiec Controller's built-in Web Server. No other programming software is required.

Note: There are different steps between the [MP2300Siec/MP2310iec](#) and the [MP2600iec/MP3200iec/MP3300iec](#).

Below is the list of steps to create the Project Archive for the MP2300Siec/MP2310iec:

1. Open the project.
2. Make changes to project.
3. Right-Click on the Resource in the Project Tree and select "Settings"

4. Check the box labeled "Generate bootproject during compile".
