

In some Yaskawa instruction manuals, there are two sets of reference numbers. The page numbers are on the bottom center of each page and are designated with a dash between the chapter and the page. The paragraph numbers are found on the top left corner of the page and designated by having a period between the chapter and the section. All of the terms that are referred to in the index point to the corresponding page numbers, and all terms that are referred to in the parameter listings point to the corresponding paragraphs.

This numbering system does not pertain to all Yaskawa drives: The drive manuals that use the described numbering system are listed below.
