

INTRODUCING YASKAWA'S NEW LINE OF **MEDIUM VOLTAGE DRIVES**

# BIG BROTHER

Introducing the MV1000 medium voltage drive from Yaskawa - the big brother to our already proven low voltage drive technology.

Built off the same control architecture as our world-class A1000 low voltage drive line, the MV1000 offers best-in-class technology with the lowest line harmonics impact, most motor-friendly output and longest service life of any medium voltage drive.

**The MV1000 is available in 2.4kV and 4.16 kV models in 4 different frame sizes with outputs ranging from 200HP to 5000HP. It is particularly well-suited for equipment upgrades and energy savings initiatives.**

Installation friendly • Proven reliability • High performance • Compact design • User friendly
